

# Top 5 Things to Take Note When Buying a Water Purifier

## 1. Size and design

- ☐ Slim and compact so it won't take up too much space on your countertop.
  - ☐ Sleek, aesthetically pleasing and matches your kitchen design flawlessly.
- 

## 2. Functionality

- ☐ Instantly dispenses your hot and cold water so you don't waste time waiting.
  - ☐ It cleans and maintains itself using a science-backed Sterilisation Technology to keep it hygienic and healthy for your water.
  - ☐ You can customise the volume it dispenses so it won't overflow.
- 

## 3. Ease of use

- ☐ Connects directly to water supply so you don't run out of water.
  - ☐ Straightforward and user-friendly that even kids and the old lovely folks can dispense their own water effortlessly.
  - ☐ Tankless so there's no need to top up water or clean any tank. Plus, since it doesn't store water in a tank, you'll always get fresh water.
- 

## 4. Filtration System

- ☐ Proven effective to get rid of rust, bacteria, chlorine, and other water contaminants.
  - ☐ Makes your water taste fresh, clean, and pure.
- 

## 5. Pricing and running costs

- ☐ The price is transparent and reasonable.
- ☐ There should be no extra or hidden costs that could bleed you dry for years.
- ☐ It doesn't discharge water unnecessarily so your water bills won't go up.
- ☐ It doesn't consume high electricity so you can save on your electricity bills.
- ☐ There's no need to pay for maintenance every year.
- ☐ The replacement water filter costs are budget-friendly.

# Meet the Sterra S™ Tankless Hot & Cold Water Purifier

## The No.1 Water Purifier in Singapore

Dispenses pure-tasting ice-cold, room temperature, warm, and hot water instantly.

You can push the nozzle inside to prevent the buildup of bacteria and dirt — which is unique.

Removes rust, sediments, chlorine, pathogenic bacteria, and odours using a 4-Stage Filtration System.

Tells you when to replace filters.

Made in Korea.

Slim and sleek.

It cleans itself using Electrolysis Sterilisation so no need to pay maintenance fees every year.

Dispenses water 120ml, 250ml, 550ml, or as much as you like, automatically.

Consumes up to 20X lesser electricity than other brands to cool water.

Nozzle is UV sterilised to keep it clean and hygienic.
