

IFC-98 Cubicle Track System

Suspended

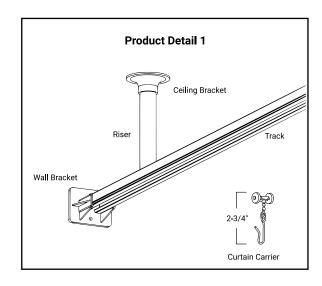

Specifications

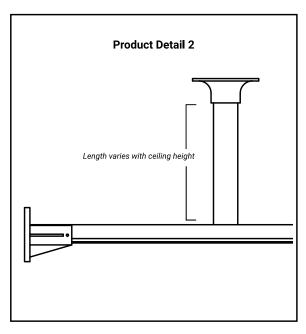

IFC-98 Suspended Track General Specification

The IFC-98S cubicle track with IFC-100 roller carrier (shown) or the IFC-600 spool type carrier is designed to be suspended from the ceiling on a series of risers. Section size is 1 - 3/8" x 3/4" x .058" wall thickness. Extruded of 6063-T5 aluminum alloy. Track has 204-R1 satin anodized finish or a white acrylic electrostatic paint. Tracks are custom fabricated to shape and size in one continuous piece, wherever possible. All custom formed track bends are based upon a radii of 12". The IFC-100 carriers are manufactured with virgin nylon bodies, steel bead chains and hard aluminum hooks. IFC-98S has been designed for cubicle curtain applications that do not allow for a track system to be mounted directly to the ceiling and is compatible with most of our best-selling curtain carriers.
