**Product Notes:** Lumina™ is a bioavailable source of plant nutrients that can promote plant vigor and nutrition. Lumina™ can improve plant growth and nutrition in most crops and cultivation systems. Lumina™ will improve plant tolerance to abiotic stresses like drought while improving overall crop nutrition and may be used in conjunction with beneficial microbes. Lumina™ can be used to correct some nutrient deficiency-based plant disorders and to improve growth. By promoting plant nutrition and vigor, Lumina™ boosts plant performance and can enhance crop quality and yields.

Lumina™ can be applied as a foliar spray or root drench. Lumina™ can be applied as frequently as every watering or as infrequently as once a week. Consider your environment, inputs, and growing intensity when determining application frequency. For optimal results use Lumina™ at the recommended application rates.
