

NZ's Top Skin Therapists

Finding the time to book in for a facial can be challenging enough, let alone deciding what therapist to go to. Therefore, once you find a great one you hang on tight! Here at The Beauty Book we have taken the guess work out and sat down with three of New Zealand's leading skin therapists to chat about skin, treatment trends, and why they all chose to work with DMK Skincare.

WORDS AMANDA BASHER

LISA DAVIS FOUNDING OWNER OF ABOUT BEAUTY AT MONACO IN NELSON

Tell us about your journey as a skin therapist so far.

I entered the industry 30 years ago and trained at Joyce Block College. I remember leaving college feeling like I knew all I needed to, but in truth, I quickly learnt that this industry is forever changing and you need to be continuously learning and upskilling. Before founding About Beauty at Monaco, I was fortunate enough to work for and learn from industry leaders such as Marianna Glucina. She placed a big emphasis on training and education which shaped me for the rest of my career. The skin is a phenomenal organ, and there is always something new to learn as discoveries are made, and new technologies arise.

Why did you choose to work with DMK Skincare and what has the feedback been like from your clients?

I was first introduced to DMK Skincare at a beauty expo and knowing what I know now; I wish I had taken it on sooner! We began working with the brand in 2018 after extensive research, and it was the four fundamentals of DMK Skincare that really resonated: Remove, Rebuild, Protect and Maintain. Using DMK Skincare in our clinic has allowed us to offer

superior facial treatments, and our clients have loved the results from the homecare. I personally have suffered from contact dermatitis for years, and after using DMK Skincare, I am completely rid of it.

What is your personal must have DMK Skincare product?

There are so many amazing products in the range which makes it very hard to choose, but the game changer for me topically would be the Melanotech Drops, \$142. These magic drops are antibacterial, healing and work on pigmentation within the skin.

Is there a 'must try' treatment within About Beauty at Monaco that we should know about?

Our skin packages are a great option for anyone looking for measurable change within their skin. At About Beauty, our mantra is that "it is about you" and therefore within our packages we tailor treatments to suit the needs of each specific client and their skin.

As a skin expert, what trends or treatments do you see arising in the near future?

Scar tissue repair is a Dermal needling treatment that I see growing simply due to the technological advancements that we are seeing, and we are having some great results on clients currently.
