

# Cotton Candy Robot (VX)

Backed by the power of robotic innovation, customers get to witness their tasty treat being spun and formed into dazzling shapes right before their eyes.

Our sophisticated robotic arm takes a fresh paper stick and spins different sugars to build flavorful layers to your confectionery treat, then shapes it into your selected design.

Our machines are designed to be fun and futuristic in appearance – our colorful, attractive designs are guaranteed to spark curiosity in whoever passes by! Perfect for malls, arcades, amusement parks, kid's stores, restaurants and anywhere with high foot traffic.
