HIGH SECURITY
CHANGE MACHINES

Combining Security & Technology with High Capacity

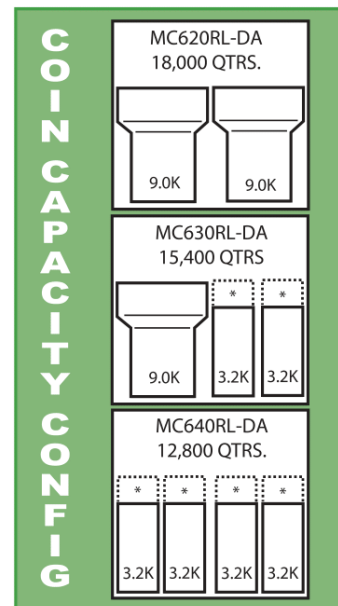

Standard Change-Makers, Inc. is pleased to introduce their latest offering in Rear Load change machines with the new MC600RL-DA Series. Standard has utilized the superior cabinet strength and security for which they are known and integrated the technology & versatility of their Modular Series changers, making for the perfect combination!

These new change machines feature multiple configurations that allow for higher coin capacities and a new cabinet design that removes the weight of the coins from the door. These features are housed in a heavy duty, welded steel cabinet with two (2) crank style locks and Medeco™ lock plugs, providing superior security.

These machines are perfect for those busy weekends when you need to provide lots of change to your customers!

The MC600RL-DA Series includes:

- Two Bill Validators - choice of: Coinco or Mars with 1,000 bills stackers on each
- Multiple Hopper Configurations (see chart below) that provide higher capacities and different coin dispensing options
- Dual Redundancy Feature - allows all bill acceptors and coin dispensers to communicate with each other (Built-In Back-Up)
- Welded Steel Cabinet with Stainless Steel faceplate and applied Lexan™ graphics decal
- Expanded Function (EF) Module for programming, auditing and reporting features
- Two (2) Crank Locks with Medeco™ Lock Plugs
- Two Year Limited Warranty

* 3.2K (3,200) Quarter Hoppers can be upgraded to 5.2K (5,200) Quarter Hoppers for additional capacity
