CHANGE MACHINES

Combining Security & Technology with High Capacity

Standard Change-Makers, Inc. is pleased to introduce their latest offering in Front Load change machines with the new MC800-DA Series. Standard has utilized the superior cabinet strength and security for which they are known and integrated the technology & versatility of their Modular Series changers, making for the perfect combination!

These new change machines feature multiple configurations that allow for higher coin capacities. These features are housed in a heavy duty, welded steel cabinet with two (2) crank style locks and Medeco™ lock plugs, providing superior security.

These machines are perfect for those busy weekends when you need to provide lots of change to your customers!

The MC800-DA Series includes:

- Two Bill Validators - choice of: Coinco or Mars with 1,000 bills stackers on each
- Multiple Hopper Configurations (see chart below) that provide higher capacities and different coin dispensing options
- Dual Redundancy Feature - allows all bill acceptors and coin dispensers to communicate with each other (Built-In Back-Up)
- Welded Steel Cabinet with Enamel, Powdercoat Painted Finish and applied Lexan™ graphics decal
- Expanded Function (EF) Module for programming, auditing and reporting features
- Two (2) Crank Locks with Medeco™ Lock Plugs
- Two Year Limited Warranty

COIN CAPACITY CONFIG	MC820-DA 18,000 QTRS.	
	MC830-DA 15,400 QTRS.	
	MC840-DA 12,800 QTRS.
