with *Glory™* Bill Dispensers

**BX1010/BX1020**

**FRONT LOAD**

**BX1010RL/BX1020RL**

**REAR LOAD**

## Easy to Use - More Convenience for your Customers

Standard Change-Makers' **NEWEST** version of our BX Series Bill-to-Bill Exchangers is now available with the Glory Bill Dispenser. Combining our Modular *Smart Hopper* technology with MDB serial interface, the new BX-Glory Series will provide more convenience and choices for your self-service businesses.

These Bill Exchangers accept higher denomination bills, and dispense lower denominations. The BX1010RL has the one-denomination bill dispenser, that can break \$10's and \$20's into \$5's or \$1's. You can now have up to four dispensers - providing additional capacity, or multiple denomination pay-outs. **You decide what you need - we'll build it!**

- **MDB Serial Interface** provides more accurate communication between the Bill Dispenser & Bill Acceptor
- **Switching Power Supply** generates less heat - which adds longer life and better performance
- **Programmable Smart Hopper Bill Dispenser** allows DIP switch functional programming without the need for a handheld device
- **Flash Code Error Display** - allows you to troubleshoot problems quickly and easily
- **Easy to Service** - Easy access to the Control Board, and easy serviceability in the field
- **Two Year Limited Warranty**

### BX-Fujitsu Series standard features include:
