

3Shape

Let's change dentistry together

3shape 

Led by entrepreneurs

In the year 2000, Danish engineering and business graduates Tais Clausen and Nikolaj Deichmann wanted to turn their passion for 3D technologies into a business. They identified how the hearing industry had the potential to be transformed by digital solutions. Their maiden modelling software and digital scanner was well received by hearing aid manufacturers, and marked the start of 3Shape going on to supply most of the major global players in hearing healthcare. Tais and Nikolaj recognized that the same 3D technologies could revolutionize the dental sector, and gained acclaim for their first dental lab scanner launched in 2005.

Today, dentistry is the core of 3Shape business, and Inside Dental Technology magazine has named Tais as one of the most influential people in dental technology. 3Shape remains committed to the same entrepreneurial spirit that has made it one of the most game-changing digital dentistry brands in the world.

Challenging and innovating dentistry

Every second, 365 days a year, a dental unit is made using a 3Shape system in over 100 countries across the globe.

3Shape's pioneering portfolio of 3D scanners and suite of CAD/CAM software is changing the way dental professionals work.

Our ground-breaking technology is engineered to excel patient care and set new standards in speed, accuracy and workflow efficiency in dentistry.

We are the first-choice for thousands of lab technicians, dentists, implant surgeons and orthodontists.

"3Shape is driven by innovation. Like Apple, they strive to make digital products that constantly add value... and they look cool too."

Dr. Jonathan L. Ferencz

Professor of Prosthodontics and Restorative Dentistry

We innovate for superior patient care

Innovation is the heart of our business

Over one-third of all 3Shape staff are dedicated to creating next-generation technology and smarter workflows to improve patient experience.

Challengers of the dental industry

In 2017, we launched the world's first wireless intraoral scanner that boasts documented accuracy, realistic colors, remarkable speed and compact comfort. We developed a unique movement correction technology that eliminates patient head fixation in CBCT scanning (3Shape X1®*), and continue to lead the way in intraoral scanning with pioneering diagnostic aid tools** for the detection of possible surface and interproximal caries.

Changing dentistry together

Our vast global network of industry experts, dental partners, doctors and lab technicians are instrumental in steering 3Shape in the right direction. We gain their valuable patient and industry insights through knowledge-sharing sessions that help us maintain a patient-centered approach to our product development.

*X1 is not cleared by the FDA for use in the US. The 3Shape X1 Scanner is currently available in France, Belgium, Switzerland and Denmark.

**Caries diagnostic aid is not cleared by the FDA for clinical use in the US

"We always seek to push the envelope in terms of creating new and exciting digital dentistry solutions. Working together with dental professionals and industry leaders assures us that, as a company, we remain focused on delivering products that provide the best patient treatment possible and that make everyone's job simpler and more effective."

Tais Clausen

Co-Vice Chairman of 3Shape

The 3Shape Portfolio

Your route to better dentistry

3Shape provides industry-leading scanners and fully integrated software that create highly streamlined processes for dental treatments.

Our solutions are designed to seamlessly work across brands, providing an open ecosystem that gives dental professionals more options, efficiency and opportunities to grow their business.

3Shape is renowned for its unrivaled range of treatment integrations, extensive libraries, and interfacing to a large number of manufacturing equipment and materials. Providing dental professionals with complete end-to-end solutions that cover scanning, diagnostics, planning, design and production workflows.

Winning design

From the market-first Movement Correction technology of the X1[®] CBCT scanner, to the fully-adjustable TRIOS[®] MOVE+[®], to the advanced E scanners making CAD/CAM accessible for every lab, 3Shape solutions are created with the same design DNA – streamlined functionality and ease-of-use.

About 3Shape

3Shape is changing dentistry together with dental professionals across the world by developing innovations that provide superior dental care for patients. Our portfolio of 3D scanners and CAD/CAM software solutions for the dental industry includes the multiple award-winning 3Shape TRIOS® intraoral scanner, the 3Shape X1® CBCT scanner, as well as market-leading scanning and design

software solutions for both dental practices and labs. Two graduate students founded 3Shape in Denmark's capital in the year 2000. Today, 3Shape employees serve customers in over 100 countries from 3Shape offices around the world. 3Shape's products and innovations continue to challenge traditional methods, enabling dental professionals to treat more patients more effectively.
