ALL-BOND UNIVERSAL is the ideal chemical formulation for both self-etch and total-etch adhesion

Indicated for direct and indirect restorations

Contains **MDP monomers** for enhanced durability

Ultra **mild acidity** (pH > 3) allows for universal compatibility with dual-cured and self-cured materials

Hydrophobic formula (resin friendly) results in improved durability of the bond

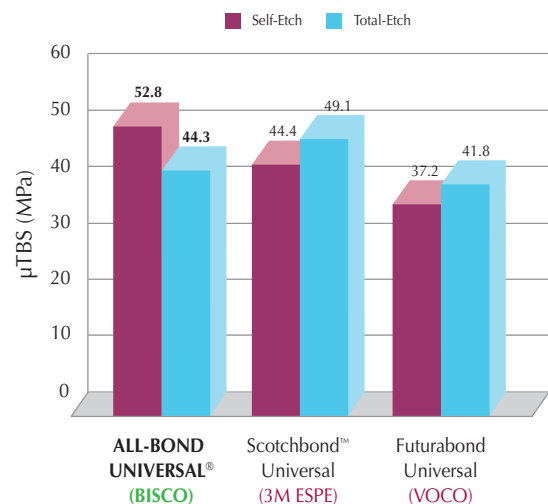

Low film thickness allows the adhesive to readily flow into etched surfaces and offers both chemical and mechanical sealing

Clinical evaluation confirms the ease of use as a benefit leading to **virtually no post-operative sensitivity**

1. Treatment plan: lithium disilicate veneers #4-#13 with minimal preparations on enamel only.

2. A total etch technique was used with ETCH-37™ with BAC for 15 seconds and rinsed well.

3. ALL-BOND UNIVERSAL was applied liberally in several coats to a moist tooth surface.

4. ALL-BOND UNIVERSAL was air thinned, leaving a shiny surface.

5. eCEMENT® L/C was applied to the tooth surface and each veneer was placed and light-cured.
