

Klean

2024 COLLECTION

Better Business

Co-owners, brother and sister
Jeff Cresswell and Michelle Kalberer

We use our business as a force for good in everything we do—from the products we make to the nonprofit partnerships we forge, to the way we show up in our communities and the positive impact we have on the world.

Family, Employee and Woman-Owned

This unique structure pairs complete operational freedom and autonomy with a commitment to caring for our people and the environment. After one year of employment, all Klean employees are eligible to participate in Klean's Employee Stock Ownership Plan (ESOP). This progressive way of doing business is uniquely Klean and allows us to be uncompromising in using our business as a force for good.

Climate Neutral

Climate Neutral is a nonprofit organization working to accelerate the transition to a low-carbon world by recruiting companies to publicly measure, reduce and offset their carbon emissions. Klean Kanteen has completed the organization's rigorous three-step process and is now 100% carbon neutral in the manufacture and delivery of its products worldwide.

The Climate Neutral Certified label empowers socially conscious purchasing and has the potential to harness the buying power of millions of people worldwide, who are concerned about climate change. Look for the Climate Neutral Certified label on all Klean packaging. Our near-term plan for continuing to reduce our greenhouse gas emissions includes:

- Reduce primary packaging material use
- Increase recycled content in all primary packaging
- Increase renewable energy use at product manufacturing locations
- Continue to purchase carbon offsets

Other Third-Party Verification

B Corp

Klean Kanteen is part of a growing movement of businesses known as B Corps that are committed to balancing purpose and profit. As a certified B Corp, we look for ways to create social and environmental benefit through our business. Every three years, an independent body scores our practices and performance against the B Corp standard for socially and environmentally responsible business.

1% for the Planet

We donate 1% of our sales to environmental nonprofits through 1% for the Planet. That means every time someone buys a Klean Kanteen product, we invest 1% of their purchase in organizations working hard to make the world a more resilient and sustainable place. To date, we have given away more than 3.7 million dollars in unrestricted funds.

Product Features

Stamp of Approval

We partnered with Intertek, a third-party quality assurance certifier whose certification seal is on all packaging. In addition, a “90% Recycled Steel” icon is engraved on each Klean Kanteen product made with certified recycled steel.

Our Performance Features

Klean Coat®

As a company, we make hard decisions when we know they are the right ones. Klean Coat is one of those tough choices. We wanted to switch to a more durable powder coat finish, but we needed time to do it right. We partnered with the nonprofit Clean Production Action and utilized their rigorous chemical hazard assessment tool, GreenScreen® for Safer Chemicals, to develop a custom powder coat finish that goes above and beyond regulatory standards.

We won't lie ... it was hard to wait, but we're glad we did. Our Klean Coat finish is safe for people and the planet, as well as four times more durable than our previous paint. In fact, Klean Coat has become the new industry standard for safety and durability.

Climate Lock™

Our cutting-edge TK Closure™ takes thermal performance to a whole new level. We've replaced the traditional external thread closure system on our lids and bottles with a revolutionary internal thread design for optimal thermal performance. This design pairs with our award-winning Climate Lock double-wall vacuum insulation to create a stronger insulated barrier inside your Kanteen.

TK Closure Internal Thread Design

We've doubled down on our commitment to Earth-friendly design and manufacturing by sourcing certified 90% post-consumer recycled 18/8 stainless steel for all of our stainless products.

90% Recycled Steel

Switching to recycled stainless steel has resulted in a:

50%
Reduction in Steel
Greenhouse Gas Emissions

30%
Reduction in
Energy Demand

60-80%
Reduction in
Ecosystem Impacts
