STEM Toy for
Young Minds

Unlock Social
Emotional Skills
Through Play

YOUR #1

WATER FRIEND!

THE ULTIMATE WATER TOY!

Get ready to dive into a world of adventure with BobBee, our latest innovation in water play! BobBee isn't just any ordinary water toy – it's a STEM-powered companion designed to ignite curiosity, creativity, and learning in kids of all ages.

STEM-POWERED FUN!

BobBee isn't just about splashing around – it's about learning through play! With its unique design and interactive features, BobBee introduces children to fundamental STEM concepts like buoyancy, water displacement, and more, all while having a blast in the water.

The water toy that combines learning, experimenting, and fun! Ideal for bath time, STEM activities, and water tables, BobBee's vivid colors, adorable face, and clever design offer endless opportunities for creative play and sensory exploration.

Ali

SPECIAL. NEEDS TEACHER

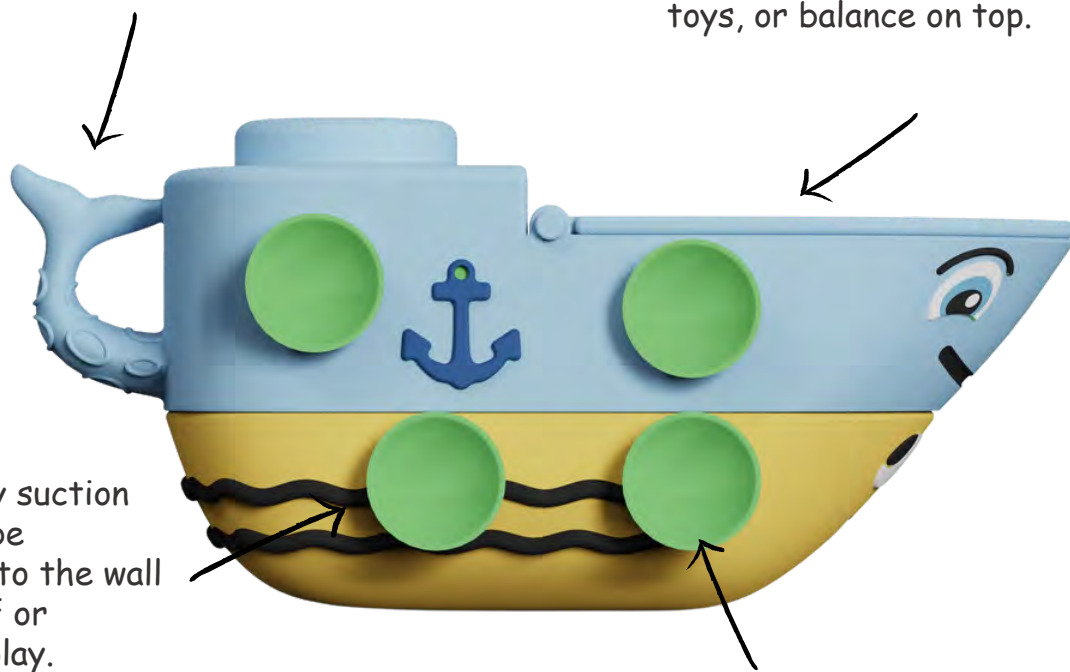

VERSATILE DESIGN

BobBee is more than just a toy – it's a versatile playmate that can be used in endless ways! From using the bee as a soap container to attaching the suction cups in the bathroom for bathtime fun, BobBee offers limitless opportunities for imaginative play and exploration.

The tail is used as a teether and a handle,

Use Bob to store small toys, or balance on top.

The handy suction cups can be attached to the wall to dry off or creative play.

3 IN 1 BOAT

Use Bee to rinse your hair or store toys.

At Griddly Kids, we believe in making learning fun, and BobBee is no exception! With its captivating design and hands-on features, BobBee provides hours of entertainment while promoting critical thinking, problem-solving, and STEM literacy.

Don't miss out on the buzz – bring home BobBee today and let the aquatic adventures begin! Perfect for kids of all ages, BobBee is sure to create waves of excitement wherever it goes. Get ready to make a splash with BobBee, the ultimate STEM water .

Visit our website or your favorite retailer to get your hands on BobBee today and unlock a world of STEM-powered fun! Let's make a splash with BobBee and inspire the next generation of young scientists, engineers, and innovators!

STEAM SCIENCE + ART KITS & STEM GAMES

MAKE LEARNING MORE FUN!

From strategy games to word puzzles, our games are designed to reinforce essential skills while keeping kids entertained for hours.

Griddly Games STEAM Kits combine scientific experiments and art activities to inspire an interest in learning through hands-on, experiential play. The “Just Add” line makes engaging in science and art at home easy by using supplies you already have. Every kit comes loaded with everything you need; all you need to do is add the missing ingredient.

All the kits feature instructions in English, French and Spanish. Offering experiential learning everywhere they turn, our “Just Add” Line provides hours of engaging entertainment that promises to leave them with an expanded understanding of everything they experience.

We hope to nurture a passion for Science, Math, Engineering, Technology and Arts with every one of the games and kits we create. More importantly, we hope to make playtime an unforgettable, meaningful and exciting learning experience. Griddly Games believe that we need to respect our environment and we design our packaging to encourage Reusing, Recycling, Repurposing and Reducing.

SMART toys encourage children to engage in learning through play, leaving an everlasting knowledge. Using logic, language skills, creative and strategic thinking our mission is to encourage a lifelong passion for learning and empowerment of future generations. Our STEM games and STEAM kits are perfect tools for home use and Homeschooling as well as just plain old fun.

SHOW ME THE KWAN

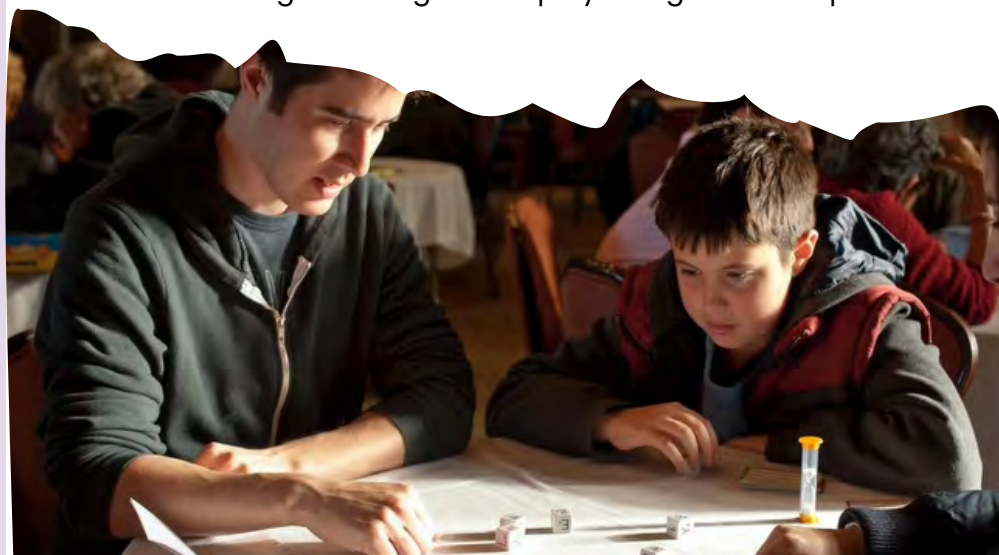

Word Game

Our Product

\$15.00 Cdn., each, 8 per case

Play this award-winning word game. Show Me The Kwan is a clever, road-ready party game where spelling isn't everything! Pick your category and roll the letter dice. Watch for the die that has "1st, 2nd, or Last" on its side because this determines how the game will be played!

Everybody calls out words that fit the category, but don't worry about spelling them with the letter dice! Instead, find words based only on their "1st, 2nd, or Last" letter. Race to call out as many words as you can using the letters on the dice. For example, if the category was Groceries, and the die rolled "2nd" everyone would use the remaining letters to call out words like "Banana" or "Beet" Everyone has the opportunity to get silly and personalize game answers to their experiences, leading to more points for everybody! Good luck and happy wordplay! This game featured instruction in English. Designed for players ages 8 and up.

KIT INCLUDES

- 16 Blue rockets
- 16 Green rockets
- 16 Purple rockets
- 16 Orange rockets
- 2 Red dice
- 1 Blue dice
- 2 Double-sided game boards
- 1 Playing box
- 1 Instruction Booklet

OVERSIGHT

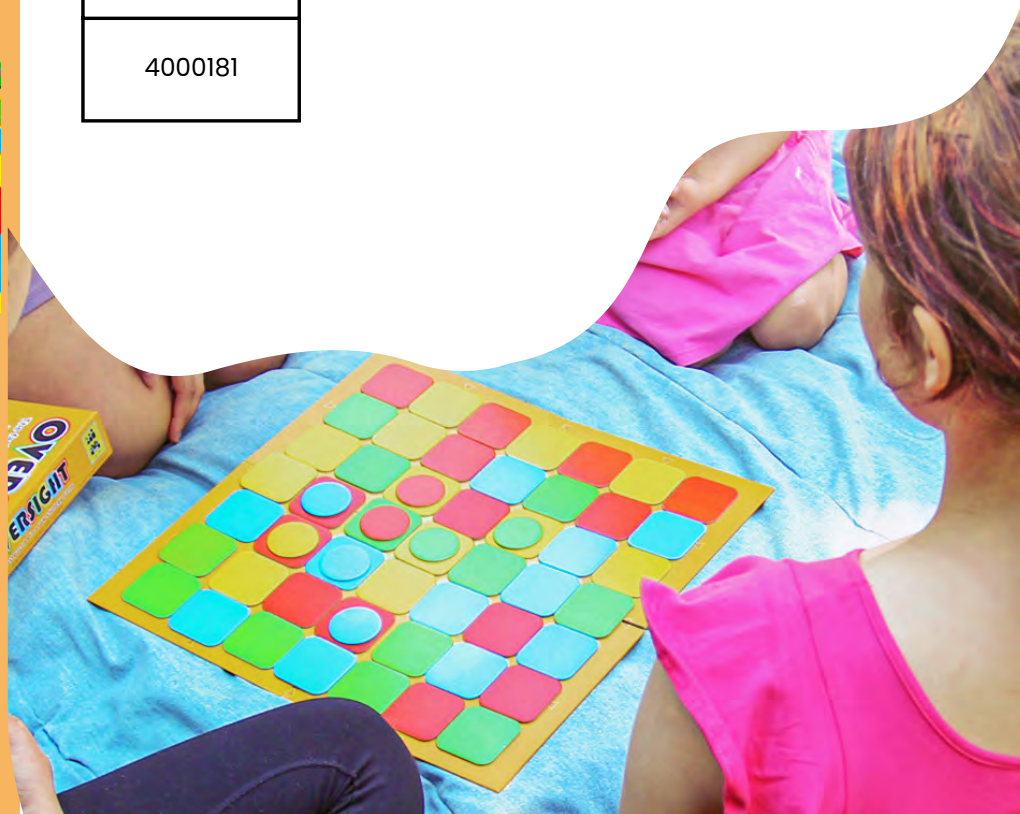

Dynamic Four-in-a-Row

Our Product

\$19.50 Cdn. each, 6 per case

Play this award-winning STEM game, exercise your mind and outwit your opponents with a game of Oversight™. Two to four players compete to be the first with 4 tokens in a row. Players can place a token on the board, or shift an entire row or column of squares by one space. The rules are simple but the game becomes more complex as players learn from their mistakes, pay close attention to the color distraction, and begin to predict their opponents' moves. This brain-bending game features instructions in English, Spanish, German, and French. Designed for players ages 7 and up.

SKU
4000181

KIT INCLUDES

- 5 Hematite stones
- 1 Instruction Booklet

FAMILY 6+

5 STONES

Pickup Game, Hand - Eye Coordination

\$7.50 Cdn. each, 12 per case

Our Product

Try the endless ways to play the game that inspired Jacks! Take turns attempting your own tosses or try to catch the stones as they bounce, spin, and roll away! How will you catch the stones? Only a few minutes of play can strengthen hand-eye coordination in a captivating way.

Players build upon what they learn and have fun creating their own rules for play. Even when playing with a group, 5 Stones proves to be an addictive hand game that occupies hours! Guidelines for traditional play are included, and experimental play is always encouraged!

This hand-eye coordination game features instructions in English, Spanish, and French. Designed for players ages 6 and up.
