for Frothe Tips & Tricks — *J. Webb*

AMMO FROTHe is a 20x concentrated (low pH) Humectant that creates a thick shaving cream-like foam to protect the surface of your paint from scratching during a hoseless wash. Formulated with salt-neutralizers for harsh salt-heavy winter environments, or coastal regions that cause accelerated corrosion and damage. Perfect for apartment dwellers, water restricted areas, or dry oceanside climates. Desert rally, top down. Both out of breath and thirsty. Drive towards the nearest cloud, wind moves the wheel, you tighten grip, dust settles. The air chills her wet skin, engine cools just enough to go flat out again. AMMO FROTHe is about “the drive”. It’s made for people who care about the way their car looks, as much as its performance. For a feast of information and helpful videos go to ammonyc.com.

DIRECTIONS 1. Use with AMMO Aerator, Pro Foamer, or wall-mounted Foamer. 2. Add 4 oz of FROTHe (6 cap-fulls) to the reservoir, then add 40 oz of warm water and shake. 3. Pump the sprayer to max pressure. 4. Evenly spray FROTHe in side-to-side motions, top down, one panel at a time. 5. Wipe in straight-line motions from top to bottom with MF towel. Rotate the towel as it becomes dirty. 6. Once clean, use HYDRATE or HYDRATE PRO for the final wipe for insane depth and shine. **PRO TIP:** Apply a thicker layer on the lower parts of the car and thinner layers towards the “less dirty” top regions. Rotate towels frequently. Can be used on wheels.

⚠ WARNING: THIS PRODUCT CAN EXPOSE YOU TO CHEMICALS INCLUDING DICHLOROACETIC ACID, WHICH IS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, AND DICHLOROACETIC ACID WHICH IS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM.
