for Reflex Pro Top Coat Tips & Tricks - *J. A. K.*

**AMMO REFLEX PRO TOP COAT** is a sprayable ceramic topper designed to add 2-3 months of clear coat protection. This can be applied to WET or DRY surfaces. Used to maintain a previously coated car, or to quickly protect an uncoated car. **TOP COAT** will increase depth and shine, and provide absolutely overwhelming reflection. No exaggeration. Evening descends. Turn off the highway onto a lonely back road. Radio off. Navigation too. Tall trees casting shadows over the hood. Crisp autumn air through the open window. The bellow of the engine beckoning you further into the unknown. **AMMO REFLEX PRO TOP COAT** is about "the drive." It's made for people who care about the way their car looks, as much as its performance. For a feast of information and helpful videos go to [ammony.com](http://ammony.com).

**DIRECTIONS** 1. Spray directly onto paint, wheels, trim and glass after a healthy car wash while paint is still wet. 2. After light application, gently re-rinse the paint to spread the product with a hose or pressure washer. 3. Immediately dry with HYDRATE and a damp MF towel. **NOTES:** Only use on a clean car. If necessary, use FOAM, SPIT or FROTHE to remove heavy contaminants safely (with lubrication) prior to maintaining the paint with TOP COAT, as it does not offer lubrication. **PRO TIP:** You can reapply or touch-up the paint once dry with TOP COAT during final inspection or any time as long as the surface is not heavily soiled. The more layers you add over time, then more reflection you will see. Works best if layered over REFLEX PRO ENAMEL COATING.

**⚠ WARNING: THIS PRODUCT CAN EXPOSE YOU TO CHEMICALS INCLUDING ETHYLENE OXIDE AND 1,4-DIOXANE, WHICH IS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, AND ETHYLENE GLYCOL AND ETHYLENE OXIDE, WHICH IS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM.
