for OLEO Tips & Tricks — *J. White*

AMMO OLEO is a long lasting, layer-able trim and rubber dressing that creates high-shine and deep gloss without silicon (silicone-free), so it won't dry out the rubber. Safe for all exterior trim and tires. Made for those first days of spring. Crisp, cool air rushes in through the cracked-open window. Steering wheel dancing in your arms. Splash through puddles as the tail gets loose. A blur of color as you curve down the road. AMMO OLEO is about "the drive". It's made for people who care about the way their car looks, as much as its performance. For a feast of information and helpful videos go to [ammonyc.com](http://ammonyc.com).

**DIRECTIONS** 1. Clean and dry trim or rubber. 2. Apply OLEO to a foam applicator pad or spray directly on the surface and spread into the trim thoroughly. 3. OLEO will go on white, then dry to a high-gloss clear after 10–30 minutes, depending on ambient temperature. 4. Add multiple layers for increased shine only after base layer has fully dried. **TIP:** When possible, allow treated areas to dry in the sun to aid drying and avoid premature tire sling. OLEO is a long last "medium to high-shine" water-based dressing. AMMO MUD is a "low to medium" shine water-based dressing. **SHAKE WELL. DO NOT FREEZE.**

**CAUTION: AVOID EYE AND SKIN CONTACT. KEEP AWAY FROM CHILDREN.**

If swallowed, call poison control center, physician, or emergency room immediately. Do not eat or drink when using this product. Always use as directed. Keep container tightly closed. Do not freeze. Dispose of contents/container in accordance with local / regional / national / international regulations. For chemical emergency response center, contact 800.535.5053.
