Decarb Instructions

WELCOME TO THE EDIBOX

01. Easily activate and decarb your special herbs and flowers
02. Maximize potency by baking at precise temperatures.
Most ovens are not correct causing over- or under-baking.
03. Control unwanted odors with a sealed lid
04. Costs less than decarb machines, spend more on your herbs

Edibox

- ✓ Safe Food Grade Silicon, BPA free
- ✓ 2 Thermal points to choose from, one on the top or side
- ✓ Air-Tight Sealed Lid
- ✓ Holds up to 3 ounces of herbs

Thermometer

- ✓ Premium Stainless Steel thermometer
Digital display for OUTSIDE the oven
Stainless steel probe for INSIDE the oven
- ✓ Target Temperature Setting
- ✓ Alarm when target temperature is reached or exceeded
- ✓ Easy buttons and Large LCD screen
- ✓ Includes magnet and stand on the back
- ✓ F°/C° toggle

WARNING

Do not place Digital Display in the oven.
Heat may cause a fire.

THERMOMETER INSTRUCTIONS

ON/OFF

- ✓ To turn display On or Off, press ON/OFF button on back.

Choose °C or F°

- ✓ Switch to TEMP on back.
- ✓ Press °C/°F button to switch between Fahrenheit and Celsius temperatures.

Select Your Temperature Target

- ✓ Switch to TEMP on back
- ✓ Press the UP or DOWN button to raise or lower desired target temperature one degree.
- ✓ Press and hold button to change temperature faster.

How to Start or Stop the timer?

- ✓ Switch to TIMER on back.
- ✓ Press S/S to Start or Stop the timer.
- ✓ When timer is done Alarm will beep two times repeatedly.

Turn Alarm On / Off

- ✓ Turn the Alarm On or Off by pressing the Alarm button on the back
- ✓ NOTE: Icon will appear in upper right to confirm Alarm is On.
Bell for TEMP or ((())) for TIMER
- ✓ If TEMP: Alarm will beep 3 times repeatedly when desired target temperature is reached or exceeded.
- ✓ If TIMER: Alarm will beep 2 times repeatedly when time is done.

OVEN TEMPERATURE TEST

NOTE : DO NOT SKIP THIS VITAL TEST.
Most oven display temperatures are not accurate.

For the best results from your herbs, you must decarb at the correct temperature, not over or under baking.

01. Perform the temperature test with no herbs in the box.
02. Insert the thermometer probe into either hole on the box and secure the lid.
03. Place the empty Edibox into your oven.

**NOTE: GENTLY CLOSE THE OVEN DOOR
OVER THE CABLE.**
The digital display must remain **OUTSIDE**
of the oven.

04. PREHEAT your oven to 240°
05. Read the thermometer to see if the oven heated to the correct temperature.
06. Adjust your oven setting as needed, raising or lowering your setting.

EXAMPLE

Target Temperature of	240°
-----------------------	------

IF the Oven Setting Displays:	240°
BUT the EdiBox thermometer reads:	250°

Then your Oven runs Hot

LOWER the oven setting:	10°
-------------------------	-----

DECARB INSTRUCTIONS

Herb	Target Temp	Minutes
THC	240°F / 121°C	60
CBD	280°F / 140°C	60
CBN	320°F / 160°C	90

01. Preheat oven to Target Temperature. (Adjust oven setting as needed per the Oven Temperature Test results.)
02. While waiting, gently break up flowers and buds into smaller pieces. No grinding needed, popcorn sized material is sufficient.
03. Place herbs inside EdiBox and firmly press lid down on all sides.
04. When the Target Temperature is reached, place the EdiBox with temperature probe into the center of the oven.

NOTES:

Place in center of the oven so heat circulates evenly.

Gently close the oven door **OVER** the cable. The digital display must remain **OUTSIDE** of the oven.

Leave the thermometer in the box while baking to monitor temp.

05. You want the EdiBox at temp for 1 hour. Once finished, use caution as the EdiBox will be HOT.
06. Let box and contents cool completely. This helps preserve the terpenes and original flavor.

TIP: Use your freezer to speed up the chilling process. Approx 10-15 minutes. Set a timer and don't forget!

IMPORTANT DECARB NOTES:

Higher temperatures or longer baking times activate other cannabinoids like CBD or CBN. THC will be less effective if recommended temperatures or baking time is exceeded. "Speed decarbing" to reduce baking time is a myth. Trust us, proper decarboxylation will be worth the wait.

WARNINGS

DO NOT put digital display of thermometer in the oven.

ALWAYS HANDLE WITH CARE & USE AN OVEN MITT.

Thermometer, Cable, Baking Shell and Contents will be HOT when removing from oven.

VOLUME

L x W x H: 8.5in8 x 5.56 in x 2.83 in
21.59cm x 15.24cm x 7.62cm
205mm x 140mm x 72mm

123.2 cubic in / 68 ounces
2066400 cubic mm / 2 liters
