### RECOMMENDED SUBSTRATES:

Recommended for use on smooth, unpainted surfaces, and cured, impervious surfaces, such as filing cabinets, lockers, bathroom stalls, walls, benches, classroom desks, etc. This product is not recommended for use on porous or previously stained surfaces. Always perform a small test first to ensure product is compatible with your surface before full use. See "**Testing**" below.

### TESTING:

Performing a small, inconspicuous test area on each type of substrate and coating prior to full application will ensure product effectiveness. Failure to do a test patch can result in possible surface damage, or the need for more than one application, increasing labor and material costs.

To perform a test, follow the directions below.

### PREPERATION:

Make sure the surface is clean, dry, and free from any loose debris.

### APPLICATION:

Apply product liberally using a trigger spray bottle directly to the adhesive. Allow product to remain on the sticky surface for about 2-10 minutes. It will usually be visually clear the product is working, depending on the adhesive.

### REMOVAL & CLEAN-UP:

Gentle agitation with a nylon bristled brush or abrasive pad may sometimes be required to loosen adhesive from surface. Abrasives pads may damage surface. Gentle agitation should be sufficient.

Wipe the surface clean with a rag or sponge and rinse the product and any remaining residue from the surface with water. Dispose of waste and water according to any federal, state, and local regulations in your area that may apply.

Some surface or adhesive types may require a second application. Repeat directions above if necessary.

### COVERAGE:

Approximately 200 - 250 sq. ft./gallon.

Results may vary based on the substrate texture and porosity.

This product is sold in 22oz. trigger spray bottles. To spray larger quantities, use a pump-up garden sprayer.
