

Breakthrough Formulation

Bioactive Collagen Gel

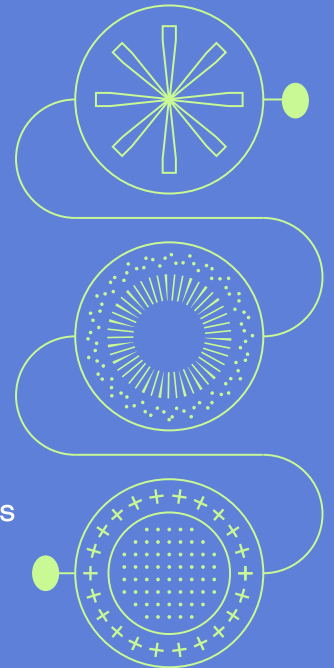

Bioidentical Hydrolysed Collagen Peptides

Functional food supplement in a delicious gel form

CONTAINING:

- + 19 Amino Acids
- + 14 Macro + Micro Elements
- + Fatty Acids

Medical grade collagen peptides of type I, II & III in its **highest bioavailable form**

Our unique type of high-pressure pasteurisation technology does not damage sensitive collagen molecules and keeps it fully intact, making it the most effective collagen supplement on the market.

Natural functional food for everyone 25+

✓ Bioidentical collagen of types I, II & III

✓ Innovative formula with natural elastin

✓ Maximum absorption & efficiency

✓ 100% natural

✓ Halal certified

✓ Hypoallergenic

✓ Not exposed to high or low temperatures

✓ No Vitamin C intake is required

✓ Great taste

✓ No sugars, alcohol, artificial sweeteners, flavorings

✓ Free of GMOs, gluten, colourings & preservatives

What is Collagen?

Collagen is a main structural protein, the base of all the connective tissues and it is present in all parts of the human body.

IT IS A BUILDING MATERIAL FOR

- + Skin
- + Blood Vessels
- + Internal Organs
- + Joints
- + Ligaments
- + Tendons
- + Hair
- + Nails

AFTER THE AGE OF:

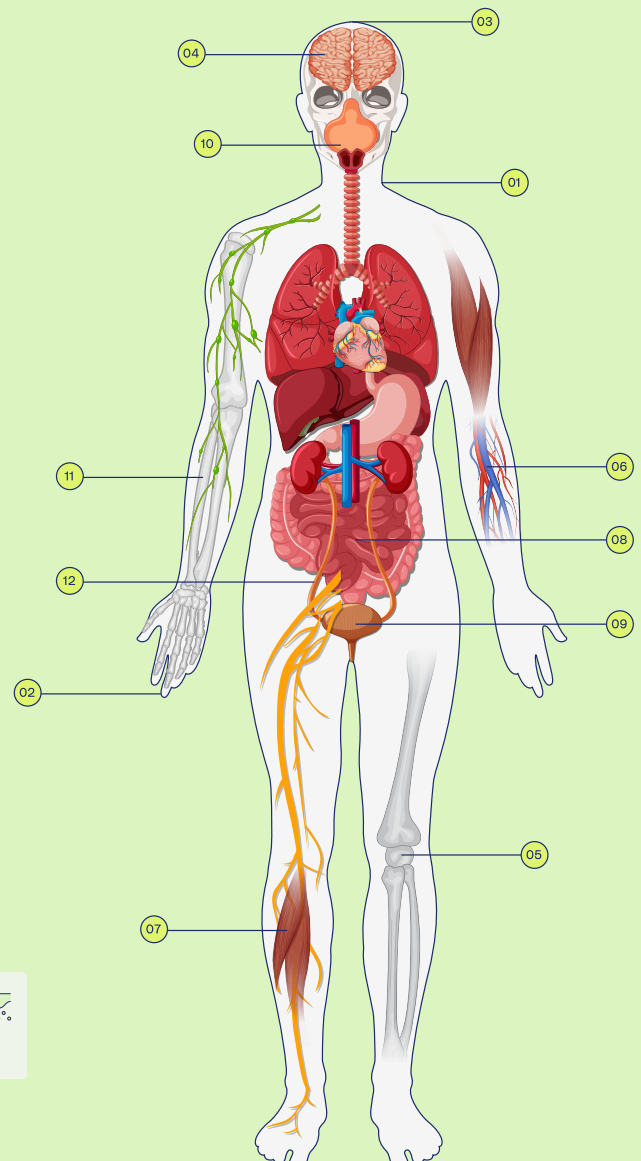

25

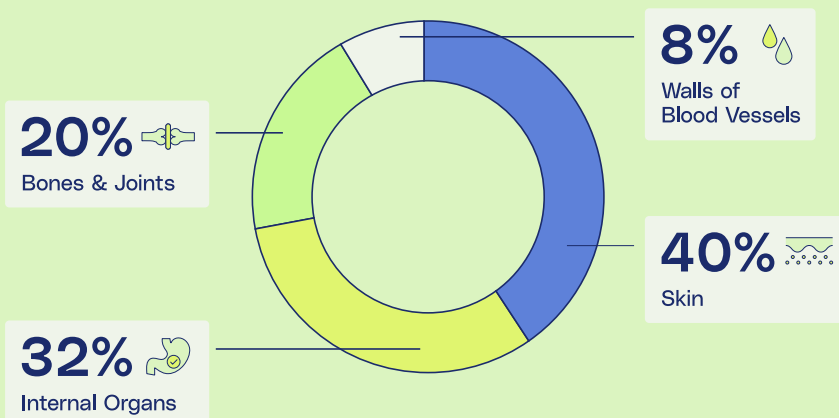

Human collagen synthesis naturally slows down after the age of 25+, therefore supplementation is highly recommended to promote an overall healthier aging process, elastic skin & beautiful hair.

Our body is 30% collagen

01 Skin	07 Ligaments
02 Nails	08 Digestive System
03 Hair	09 Ovaries
04 Brain	10 Teeth
05 Joints	11 Bones
06 Blood Vessels	12 Umbilical Cord

Distribution of collagen in the body

Why is our Bioactive Collagen Gel different?

Bioactive Collagen Gel is not exposed to critically high and low temperatures like other collagen supplements, it does not go through dehydration process and there is no fermentation.

The entire production process takes place at a temperature of no more than:

59°C

Along with pressure pasteurisation, which allows to keep the amino acid sequence in the collagen intact.

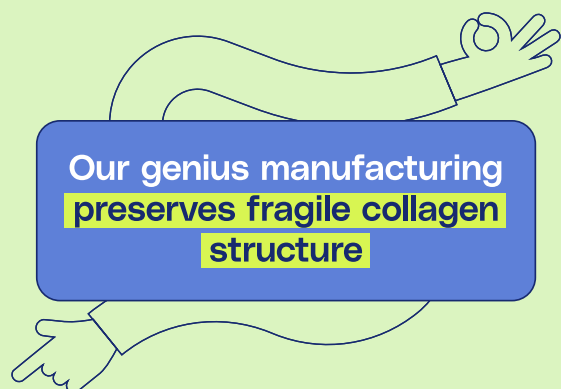

This particular extraction technology obtains collagen hydrolysate **with natural elastin.**

ELASTIN AFFECTS:

- ⊕ The strength of the tissue
- ⊕ The quality of its mobility
- ⊕ Elasticity
- ⊕ Recovery rate of the skin

It is also the best carrier of iodine in the human body. The combination of elastin with vitamins will significantly improve the functioning of the thyroid gland.

Our Manufacturing Process

Our manufacturing process (ISO, HACCP) preserves the natural three-helix structure of the collagen unlike other collagen supplements in a powdered or liquid form where natural collagen molecule is often destroyed by its processing and pasteurization.

The jelly-like form of our BIOACTIVE COLLAGEN GEL makes it the most effective way of collagen intake, in comparison to the dry or liquid collagen formulations.

Bioactive Collagen Gel differs from other collagen supplements because it contains:

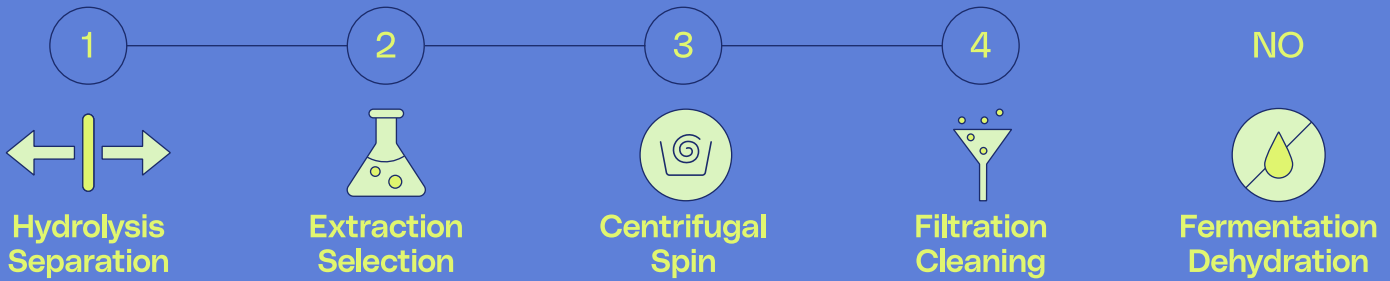

⊕ **Glycine:**
Which improves and restores brain function.

⊕ **Fatty Acids:**
Regulation of blood pressure, liver function, immune & inflammatory responses

⊕ **Hydroxyproline & Oxylysin:**
Which allows collagen to be easily absorbed without any vitamin C.

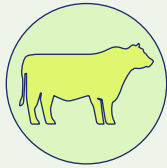

⊕ **Macro & Microelements:**
Which benefits the whole body.

Standard Collagen production of most supplements on the market:

This is the process for majority of collagen food supplements. Very often the collagen molecule is destroyed or damaged in this process, leading to much lower potency.

Types of Collagen

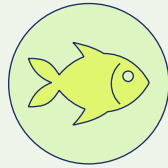

Bovine Collagen Supplements

- Extracted from cows & cattles
- Dietary supplement
- Dehydrated
- Allergenic
- Molecular weight: 300-400 kDa
- Additional intake of Vitamin C is required
- Cheap production

CONTAINS ONLY:
Collagen Type II

BENEFITS:

- + Joints
- + Cartilage
- + Ligaments

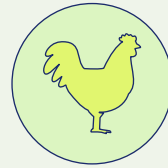

Marine Collagen Supplements

- Extracted from different types of fish
- Dietary supplement
- Dehydrated
- Less allergenic
- Molecular weight: 40 kDa
- Additional intake of vitamin C is required
- Expensive production

CONTAINS ONLY:
Collagen Type I & III

BENEFITS:

- + Skin
- + Blood Vessels
- + Hair
- + Nails

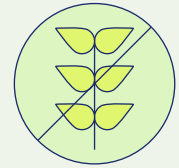

Chicken Collagen & BIOACTIVE COLLAGEN GEL

- Extracted from different parts of chicken
- Functional food product
- Hydrolyzate
- Hypoallergenic
- Molecular weight: 12-270 kd kDa
- Does not require additional taking vitamin C
- Expensive production
- Multimolecular & highest absorbtion

CONTAINS:
Collagen Types I, II & III

BENEFITS:

- + Skin
- + Blood Vessels
- + Hair
- + Gut Health
- + Nails
- + & Then Some

Vegan Collagen

COLLAGEN CANNOT BE VEGAN

It is a marketing ploy!

About our product

Halal Certified

- ✔ Presence of the two Muftiate's experts during the entire production cycle
- ✔ Compliance with all the canons of Islam
- ✔ Real HALAL product

Product Pride

- ✔ Gut health, elastic skin, shiny hair, strong nails, flexible joints, strong ligaments & healthy blood vessels
- ✔ Functional food for the whole family
- ✔ Health care with a pleasure
- ✔ Delicious even for children

Instructions: Take 1 teaspoon to 1 tablespoon per day 30 minutes before meals.

Ingredients: Chicken, apple juice, distilled water.

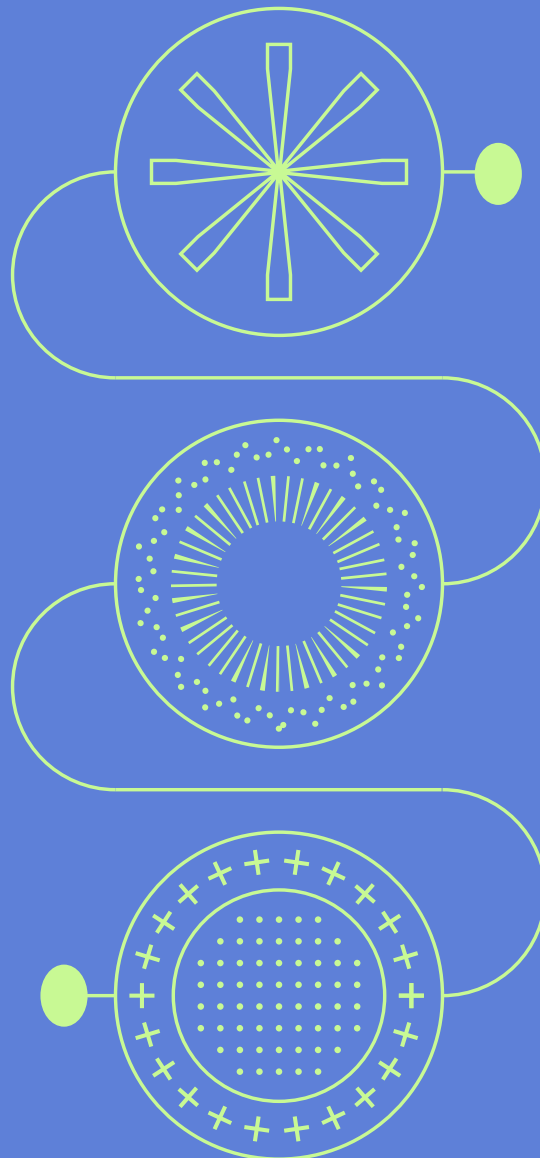

Allergens: Chicken.

Storage Conditions: Store in a refrigerator at a temperature of +4 to +8 Degrees Celsius.

Shelf Life: 12 months from the production date.

After opening: 3 months.
