

1 SQUEEZE & ZIP

2 CONSIDER YOUR OPTIONS

A. WORK ON-THE-GO

Want your Fort to be mobile? These rubber shoes work on any level surface. To install, simply stick them to your Fort at the four indicated locations, and fold them around so they are snug.

B. SET UP HOME BASE

Found your Fort a long term home? First clean and dry the surface, then attach the adhesive hook feet to the indicated locations on the Fort, centering them on the bottom edge. Once they are attached, peel off their adhesive backings. Now just set your Fort in that perfect place and press down firmly. Voilà - you're not going anywhere.

Of course, nothing's permanent - If you'd like to store your Fort or use it out On-The-Go, simply lift it off the adhesive hook feet, which will remain in place for future use.

SECOND SPACE

3 Get Busy

CARING FOR YOUR FORT

Things happen! Blot away excess spills right away, then spot clean with a damp cloth and allow to air dry.
