**1900 Imitation Dome Camera with  
28 Infrared LED Lights**

**Improve security at your home or business with these life-like decoy video cameras. With the exact appearance of real cameras, they can be installed with or instead of live camera systems to deter anyone from taking that next step!**

The LED light is an added feature giving an even more convincing impression of LIVE cameras and tight security. 2 AA batteries are required for this feature (not included).

Gain 24/7 peace of mind indoors and out! The bullet design of these decoy cameras is compact and can be installed inside or outside. The materials used are suitable for all weather conditions, too.

### **Main Features:**

- Perfect decoy surveillance camera, looks like the real thing! – save on your budget when establishing your security system together with your real surveillance cams
- Made of ABS plastic housing with transparent cover and 28 red LED lights
- Light-Dependent Resistor allows the dummy camera to turn on/off depending on the ambient lighting of your space
  - When the ambient light **turns dark** (<10 LUX), the infrared lights will **light up**
  - When the ambient light **turns bright** (> 10 LUX), the infrared lights will **dim down**

### **Package Per Box Includes:**

## **How to Install**

1. Unscrew the lid of the dummy camera to reveal the inside. Insert the battery into the power compartment.
2. Install the dummy dome camera to the wall or ceiling using the mounting screws or the double-sided adhesive tape:
  - a. If using the mounting screws, after installing the batteries in, use the install guide card to position when you want the dummy camera to be on, drill the hole on the designated ceiling or wall. With the lid still unscrewed from the body, screw in the lid onto the ceiling by inserting the mounting screws onto the hole. Finally, screw the body back to the lid by twisting it back in to lock in place.
  - b. If using the double-sided adhesive tape, after installing the batteries in, replace the lid and stick the double-sided adhesive tap onto the center of the lid's back. Remove the peel on the other side and stick the entire dummy camera onto your surface of choice
3. Dummy camera will adjust to the lighting situation of your space and will turn on/off accordingly. Reduce the rate of thieves and criminals from stealing or causing ruckus in your home, shop or business.
