Slide your battery onto the charger. Be sure to match up the contact pins on the battery to the corresponding markings on your battery plate. The battery should slide firmly into place.

Plug your charger into an available electricity socket. When it is plugged in with a battery inserted, a red light will turn on to indicate the battery is charging.

When your battery is fully charged, the light on the charger will turn green.

Insertar bateria al modulo, asegurarse que coinciden los contactos

Conectar el modillo a la corriente con la bateria a cargar. El foco rojo se va a prender para indicar que la bateria esta cargando.

Cuando el foco se cambia a verde indica que la bateria esta cargada 100%.

6

Use the DC car cable to connect to one of your car's DC power outlets if you would like to charge your battery while you are on the road.

Si quiere cargar la batana en el automobille debe de conectar el cable a la salida de la corriente del encendedor
