3-Channel Charger for Mavic 3, 3 Pro

Disclaimer:

Thank you for choosing this charger. Please read this user manual carefully before use. The first use of this charger is seen as the recognition and acceptance for the whole disclaimer. Please comply with this user manual strictly and pay attention to the precautions. The company shall not be liable for any damages caused by the user's improper use (such as short circuit, overheat, entry of foreign bodies or improper touch on the terminal by hands or mental, etc.)

Introduction:

This product could make fast charging on 3 drone batteries marked with 17.6V; with the protection for over-voltage, over-current, over-heat, overcharge and balance.

How to use the charger:

Input
100V - 240V AC

Switch
"O" -- Turn Off
"I" -- Turn On

LED

Battery Charging Port
DC 17.6V 4A

USB Charging Port
DC 5V 3A

Attention:

1. Please place the charger on a stable surface when charging. Do not cover the charger. Ensure that there is sufficient heat dissipation.
2. When the battery level is higher than 90%, it may not charge automatically when connected.
3. Automated prohibition for charging when the used battery is very hot in a short time. The LED4 flashes for alarm. Charge the battery after it cools down to near room temperature.
4. The charger has a built-in fan to keep the charger good heat dissipation.
5. When the room temperature is lower than 7°C, battery will be protected and charging is prohibited. If the LED2 flashes, please place the battery charging in the environment of 8-40°C temperature.
6. It is forbidden to charge the battery with a damaged surface to avoid potential fire caused by a short circuit of the battery.
7. Incorrect use of the charger may result in electric shock.
8. The product is for indoor use only. Please not expose it to rain or snow.
9. Do not disassemble or assemble the charger.

Specifications:

Temperature for charging	7-40°C
Input	AC 100 – 240V
Output 1	DC 17.6V 4A*3 (211.2W)
Output 2	USB-A DC 5V3A
