

## The Client Southlake Body Auto Repair

Since 2008, Southlake Body Auto Repair of Northwest Indiana has worked toward customer satisfaction in quality vehicle upfitting, repairs, and auto sales. Their upfitting business is part of a larger operation, and one that is highly regarded - they were chosen to upfit BP Amoco's pipeline and maintenance vans.

## The Challenge & The Solution

To help with the challenge of upfitting the BP fleet, Jeff Chas briefly considered making custom made desks to install in the vehicles. He had done so in the past, but they were often "costly and time consuming". Before he did though, BP Amoco came to him with a better alternative: Gonomix. Together, we created a custom solution that fit their needs.

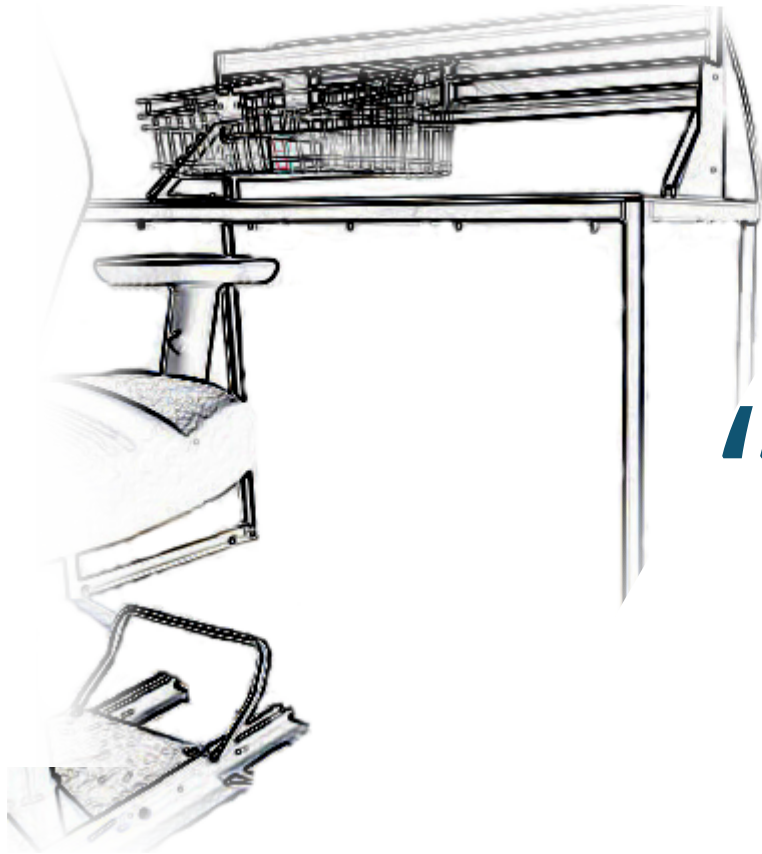

Gonomix's Custom Solution for Southlake Body Auto Repair

“ From beginning to end, everything was really good - you checked up on me. Customer service and follow-up was great. ”

- Jeff Chas, of Southlake Body Auto Repair

## Smooth Sailing

Jeff was happily surprised by the ease of installation, calling the process “straight forward and easy to install” with “no problems”. Jeff was also happy with the “slick” VanGo Seating Solution, appreciating how users were able to get “in and out easily” and remarking that he “hadn’t seen anything that nice” for seating before.

“ My techs love their new workspaces. They are so much more efficient now that they don’t have to go back to their offices to document everything. ”

- BP LDAR Supervisor
