Creative Turning Sharpening Options (1 of 2)

Creative Turning offers a number of options and possibilities to sharpen your turning tools. This leaflet gives an overview of what is available. The instructions of the various products can be downloaded from my website.

- 1. Creative Turning Aluminium oxide grinding wheels for fitting on a standard bench grinder. (The grey wheels coming standard with bench grinders are not well suited for sharpening HSS turning tools). 150mm and 200mm wheels are available in 80 and 100 grit. 32mm wide with recess for easy sharpening. Weblink
- 2. Creative Turning Diamond dressing tools for dressing the Aluminium Oxide Wheels. Diamond coated and diamond infused are available. Weblink

- 3. Creative Turning CBN wheels for fitting on standard bench grinders. 150mm and 200mm wheels are available in 180 grit. 38mm wide with a recess for fitting on standard grinders. The CBN wheels are long lasting, does not reduce in diameter, does not require dressing, ensures accurate sharpening and the metal reduces the heat during sharpening. Weblink
- 4. Creative Turning Grinding wheel bushes for fitting the grinding wheels on grinders with different shaft diameters. The bushes are turned from Delrin with close tolerances to ensure balanced running of the wheels. Weblink
- 5. Creative Turning Sharpening jig with platform. This jig ensures sharpening with accuracy and repeatability to minimise the unnecessary removal of steel and reduce heat during sharpening(CTGJ1) It consists of two bases with cam lock levers for mounting under each wheel of your grinder, one platform and a long arm with a V-pocket. This jig is suitable for sharpening, roughing gouges, skews, parting tools, and scrapers. For sharpening bowl— and spindle gouges, the Creative Turning fingernail jig is required in addition. (CTFJ1) Weblink

6. Creative Turning Fingernail Grinding Jig. (CTFJ1) This jig allows repeatability in sharpening spindle— and bowl gouges. When used with the long arm of the CTGJ1, the bevel angle can be set to the required angle. The leg of the CTFJ1 is set to grind different profiles of the wings of the gouges. Weblink

Creative Turning Sharpening Options (2 of 2)

7. Tormek slow speed wet grinder. This is the ultimate sharpening system for delivering extremely sharp and long lasting cutting edges to your turning tools. Wet sharpening eliminates any heat during sharpening and the Tormek jigs are very accurate and provide excellent repeatability. For sharpening woodturning tools the optional Woodturner kit (TNT-708) is required. It is recommended to shape the tools on a dry grinder and do the sharpening on the Tormek. For shaping on a dry grinder, the optional BGM100 Is required. Weblink

8. Tormek woodturning kit. This kit contains everything you need to shape and sharpen all your turning tools, including two patented jigs (works like three!), a radiused leather honing wheel, a serious instruction and the appreciated Turning Tool Setter. Weblink

9. Tormek bench grinder base. If you need to remove a lot of steel to create a desired shape on a new tool, this Bench Grinder Mounting Set BGM-100 enables you to use the Tormek woodturning jigs also on your bench grinder. Weblink
