

My Babiie Voluntary recall due to risk of detached handle

My Babiie are initiating a voluntary recall of the My Babiie Infant Carrier purchased between March 2023 and March 2024.

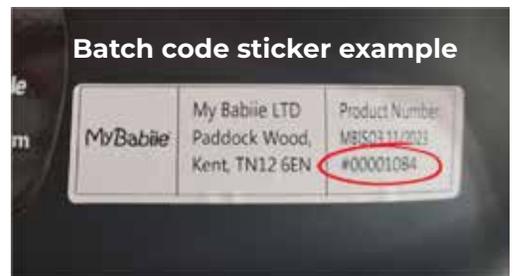

Please note, no other product is affected by this voluntary recall. We've identified a potential safety concern where a gap may appear between the handle and the seat shell, usually on one side. While this does not affect the car seat's performance inside a vehicle or during a crash, it could pose a safety risk when carrying the infant carrier outside the car. In certain instances, the handle may become loose or detach on one side causing the car seat to move unexpectedly.

What should you do?

Please check your Infant Carrier for the serial and batch number located on the seats base. If you find your product is part of this voluntary recall, please do not use the handle to carry the infant carrier. Should your infant carrier be affected, please reach out to us at info@mybabiie.com with your batch number and date of purchase.

We will swiftly arrange a collection of the infant carrier and perform a minor upgrade and return this to you.

This does not affect your statutory rights.

Affected batch numbers include: #00001084, #00001125, #00001217, #00001134, #00001135, #00001136, #00001181, #00001182, #00001183, #00001184, #00001185, #00001137 and #00001138
