

As used by the NHS Deep Cleaning and Advisory Service.

Derived from organic ingredients and kills 99.9999% of all known pathogens

Completely safe but **60x more powerful than bleach**

pathisol[™]
clinical cleaner and
disinfectant

Hospital made from organic ingredients

The benefits are clear

- + Kills 99.9999% of pathogens including Coronavirus, Norovirus and C. Diff
- + Derived from organic ingredients, PH neutral and eco friendly
- + Used in live environments
- + Can be used in existing applicators/machinery
- + Helps fund frontline patient care for NHS Trusts
- + Available in 600ml to 1000ltr containers
- + Easy to apply and works in 2-10 minutes
- + Delivered to your door each month
- + Application training provided in line with NHS standards

Additional infection prevention solutions and services

Working with schools, businesses and other organisations to bring infection prevention practices in line with NHS standards:

- + Site auditing and retraining of existing cleaning staff with official certification
- + Deep cleaning and bio-decontamination with official certification
- + Rapid outbreak assessment and response
- + Sustainable protective equipment solutions

What makes Pathisol unique?

Safe to use around people and works in minutes

Pathisol is a natural disinfectant. However, our patented technology and distribution network removes the need to add chemical stabilisers.

We simply deliver a fresh supply of the required volume to your door each month.

Directly supports front line patient care for the NHS

Pathisol Clinical Cleaner and Disinfectant is a hospital made disinfectant produced by Tutum Health at the University Hospital of Hartlepool. The income generated by Pathisol enables reinvestment into NHS Trusts to enhance frontline patient care and services.
