

WHEN YOUR POWER GOES OUT, THE MOST RELIABLE WAY TO GET THE POWER YOU NEED IS FROM A MOTOR

You already own 75% of a backup generator, sitting right there in your driveway!

MECHANICAL PARAMETERS

Net Weight	11 lbs (5kg)
Dimensions	5 x 11 x 20 inches (13.97 x 29.21 x 52.07 cm)
Storage Temperature	-22-104°F +/- 5°F (-30-40°C +/- 3°C)
Operating Temperature	-4-104°F +/- 5°F (-20-40°C +/- 3°C)
Color	Black

ELECTRICAL PARAMETER

Power Output Type	Pure Sine wave clean AC power < 3% total harmonic distortion
AC Power Output Capacity	1000 watts running, 2000 surge startup
DC Input Power	12 volts nominal, operating range 13.3-14.8 volts, 74 amperes at 13.5v DC.
Display Monitors	Waterproof DC front mounted volt meter shows vehicle 12v status. LCD diagnostic status display screen
USB-A Output	5V DC, 2.4A, 12W Max, per port
Power Conversion Efficiency	90% conversion efficiency nominal
Environmental Specs	Fully Rainproof, weatherproof patented enclosure, full use capable in winter snow and ice conditions
Management and Overload Protection Systems	Overload Protection, Over Temperature Protection, AC output Short Circuit Protection, Low Voltage Protection, High Voltage Protection
Power Output	120Vac 60Hz, 8.33 amps (1000 watts / 120 volts)

WARRANTY

Warranty	12 months, extendible to 36 and 60 month term
-----------------	---

HOW WE DO IT

We start with an inverter, kind of like the ones in your local hardware store or home depot for around \$299. Ours is a high quality commercial grade pure sine wave unit, essential to safely power your furnace, fridge, etc.

Then we add custom manufactured booster-style cables made of oxygen free pure copper, super heavy duty to handle the power, and made of a special heat proof material that can withstand the intense heat of your engine.

Then we add an adjusting strap and rubberized backing so you can safely hang it on the front of your vehicle. Plus a power meter with instructions so you know exactly how much power you can get from your vehicle safely and without damaging it.

THIS... is our CarGenerator DRY unit, \$460 This tiny 9 pound gadget will power the essentials in your home during a power outage, for 50-70 hours on a typical car gas tank.

We add our magic touch and wrap it all in a patented custom engineered rainproof ice/snow/weatherproof and highly ventilated housing to get our flagship product, CarGeneratorAllweather, ultralight at just 16 pounds, \$795.

No maintenance ever, zero hassle, no messy dangerous gas cans to wrangle, ultra low emissions, and as smooth and quiet as your car purring away idling.
