

Mass Casualty Incident (MCI) System

Categorically, nobody before us in the emergency medical industry has designed a trauma kit that folds out to allow side-by-side working with added extendable floodlights. This unique feature takes care of poor visibility and frees the hands of rescuers while bringing order to a chaotic situation.

Hand-picked by medical professionals, the contents in each kit bag are designed to service multiple patients and most of the materials within them are applicable for basic skill level use, especially controlling a catastrophic bleed.

Detachable Kit Bag Contents	Qty
Surgical Lubricant	4
NPA - L 32FR (8 mm)	2
NPA - M 28FR (7 mm)	2
NPA - S 24FR (6 mm)	2
OPA - L (size 5)	2
OPA - M (size 4)	2
