If you, a family member, friend, or colleague, suffered a catastrophic bleed – Would you know what to do next?

TyTek Medical products were developed for the battlefield. Almost every day, however, we see and hear about civilians suffered traumatic injuries following an accident. As a result, we have prioritized the treatment of point-of-injury bleeding in public spaces.

We've introduced PTENSYS (Platinum TEN SYStem) an easy to use solution that prepares you for virtually every wound-related care situation. Defibrillators and fire extinguishers are placed in malls and schools etc. as standard. Military and emergency medics agree with the inclusion of bleeding control equipment in public spaces to be equally valid. Allow us to educate, equip, and empower you to save lives following an accident in your home workplace, or other public space, so that you do know what to do next!

35%

of pre-hospital fatalities are due to bleeding from a traumatic injury.

When it Matters Most

Recent medical research has revealed that there is a Platinum ten-minute period once a catastrophic bleed has started. If you can react effectively at this time, you will be able to save lives replace. Access and convenience are paramount, and TyTek has developed the PTENSYS (Platinum TEN SYStem) range to meet your emergency preparedness challenges head-on.

Easy access kit for difficult situations

When you need assistance we're by your side

What's in it for you?

Every one of our bleeding control products contains these seven essential elements, which are evidence-based, Committee on Tactical Combat Casualty Care recommended, and hand-picked by our Physician Advisory Board. For added life-saving capability, we've added an emergency blanket and vented chest seals in our Enhanced kits, and our Ultimate kits add hemostatic gauze. All our stations are ADA compliant, so there is no added expense of recessing it into your wall.

1 Instructions For Use Card

PTENSYS
TRAUMA RESPONSE SYSTEM

All our stations include a unique roll out system and an emergency stretcher

On the move with our Bleeding Control Pouch

The Bleeding Control Pouch gives you full mobility when it is needed most. Available in standard, enhanced and ultimate versions.

Each pouch contains:

- 1 Instructions For Use Card
- 2 Pairs of Nitrile Medical Gloves
- 1 Compression Bandage (6")
- 2 Z-Fold Gauze
- 1 Pair of Piranha Trauma Shears (5.5")
- 1 Combat Application Tourniquet (CAT)
- 1 Black Sharpie Marker

This handy mobile pouch means that when you need us most TyTek are literally on your side. It can be worn on your belt, placed inside your desk or vehicle. This ensures that you can be on the scene to treat a severe life-threatening bleed quickly when seconds matter most. It empowers you to stabilize a trauma victim while you wait for the emergency services to arrive.

5 Minutes

Essential reaction time

EMERGENCY PREPAREDNESS | EVERY DAY

With the right wound, a person can bleed to death in as little as five minutes. The median time for EMS to arrive at your door after making the initial call is six minutes in suburban and urban settings and 13 minutes in rural communities.
