

# LX COLLECTION

## LED NAVIGATION LIGHTS

The LX Collection lights were the first USCG approved LED Navigation Lights, setting the standard for all others to follow. Though we've upgraded key features over the last 14 years, many of the first-generation lights are still in use around the world by military, commercial and offshore boaters.

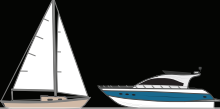

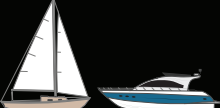

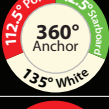

LX Collection lights run on 9V-30V DC.

**Limited LIFETIME Warranty**  
on ALL OGM Series Lights!

## LED NAVIGATION LIGHT GUIDE

ITEM #	NAME	VISIBILITY	VESSEL	BOAT LENGTH	VIEW
