CRIME FUNDAMENTALS

SOUNDSET FOR
U-HE ZEBRA 2

whatabaudio

About:

Crime Fundamentals is a dark and cinematic soundset of 188 patches for u-he's Zebra 2 software synthesizer inspired by shows like Marcella (Lorne Balfe), Blacklist (Dave Porter), Broadchurch (Ólafur Arnalds) or The Sinner (Ronit Kirchman) and also the works of John Powell (Bourne Series) or James Newton-Howard (Parkland).

Designed with the crime drama genre in mind.

Scoring a crime show or thriller movie asks for a vast range of styles and emotions. There is mystery, suspense and tension, sadness and despair but also hope and relief. There is murder, investigation, suspicion,

interrogation, action, drama and the always ticking clock in a race against time.

Crime Fundamentals gives you a great set of tools to cover every aspect of a story in your work as a film composer. You will find deep and thumbing basses, disturbed and emotional pads, simple and effective pulses, dark drones, quirky keys and mallets as well as a vast array of driving tickys to keep up the pace.

Simplicity is key

I am a big believer in simplicity: The patches are easy to use and are designed to sound like a filmscore and sit in the mix and around the dialogue right out of the box. Every sound was made with a certain purpose in mind and you can only tweak them within a range that serves a scene or emotion best. They make no use of Zebra's X/Y-Pads to go berserk and break a scene - instead everything you need is in the Mod-Wheel. The sounds will always keep their cinematic and emotional character. In the description of each patch you will find a suggestion of how to use the patch the best way, what to play and what's the best tempo and keyrange. If you find an entry like:

Best Keyrange: C1 - C2

C1 refers to midi note number 36, C2 refers to midi note number 48, etc.

I hope you enjoy Crime Fundamentals as much as I did making these sounds and write great music with it!
-Andreas

The Patches:

Crime Fundamentals contains 188 Patches

5 ARPs
4 ATMOs
28 BASSes
8 CYCLEs

4 CYMBals
3 DRONEs
4 DRUMs
10 KEYs
8 LEADs
3 LOOPs
4 MALLETs
30 PADs
27 PULSEs
8 SEQuences
12 SFXs
3 SWELLs
27 TICKYs

Installation:

Important Note: This soundset works within u-he's Zebra 2 software synthesizer (of course you can also load and tweak the patches in the "Dark Zebra / ZebraHZ" Version of the Zebra plugin). The soundset can not be used in any other software synthesizer or plugin and does **not contain** any samples.

Zebra 2 is **not** a part of this package - a valid license must be purchased here: https://u-he.com/products/zebra2/

The patches have been created with Zebra 2 version 2.9.1 (REV.9709), make sure you have this or a later version installed.

Installing the soundset is pretty straightforward:

Unzip the „WhatabaudioCrimeFundamentals.zip". Then locate your u-he preset folder and place a copy of the folder with the patches (the folder's name is: „whatabaudio - Crime Fundamentals") there:

If you're on Windows locate your „Zebra2.data" folder here:
C:\Users*YOUR USERNAME*\Documents\u-he\Zebra2.data\
Then go to ...\Presets\Zebra2\

If you're on a Mac go here:
…/Users/*YOUR USERNAME*/Library/Audio/Presets/u-he/Zebra2

The easy way

If your u-he presets are located somewhere else, you can easily find them from within the Zebra 2 plugin: Open the preset browser and load a factory preset. Use a right click on the preset name and choose Open in Explorer (Windows) or Reveal in Finder (macOS). You will now be directed to the correct installation path. It is important to place new presets there so that Zebra 2 can find and show them in the preset browser. Refresh the preset browser you're ready to go!
