

Pump Curve

Overview

- Rigid cast iron body and motor for long lasting durability.
- A greatly increased maximum submersion depth due to the mechanical seal being resistant to high pressure.
- A semi-open impeller made of high chrome alloy and a wear plate made of ductile iron.
- Effective motor cooling due to discharge channel cast as part of the motor housing.
- Top outlet allowing the user to submerge the pump in a confined area.

Applications

- Civil engineering
- Mines, quarries, coal mine & slurries
- Sewage treatment plants
- General pumping purposes
