

AMERICAN CLASSIC

A CLASSIC IS REBORN

BICYCLE TIRE RANGE 2022

AMCLASSIC.COM

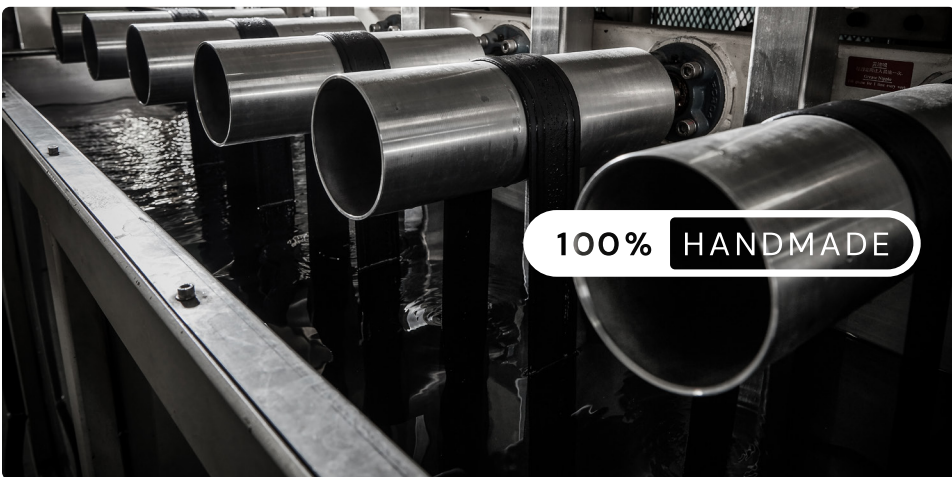

AMERICAN CLASSIC AND INNOVATION

American Classic exemplifies the pinnacle of performance bicycle engineering and innovation. In 1982, Bill Shook, the founder of American Classic left the beaten path to seek new and innovative ways to improve bicycle technology with the single-minded purpose of making bicycle sport enjoyable for all.

A global search for the finest production facility led American Classic to start its own manufacturing in 1996. The singular focus on every product detail fast-tracked American Classic to become a leader in the aftermarket.

Now American Classic is back with a complete line of tire products. Through its research and development in rubber technology, American Classic can once again push forward its innovation that exceeds all expectations.

TIMEKEEPER

The Timekeeper is our premier road racing tire. Utilizing our signature Rubberforce S tread compound, now mixed with more silica, the Timekeeper is the fastest rolling tire in the American Classic road collection. With lightning-fast straight-line speed and confidence-inspiring cornering, the Timekeeper can help you set your next segment PR and climb the ranks of the weeknight crit. The 120 TPI construction and Stage 3 Armor and Stage 3S Armor flat protection make for a supple and smooth-riding tire that can fend off common puncture hazards. The Timekeeper is available in Tubeless Ready and tube type constructions with sidewall color choices of black or tan.

TECHNOLOGY

TUBELESS READY

Ultimate construction of speed, comfort and flat protection.

STAGE 3 ARMOR

Ultralight puncture protection and a supple ride.

STAGE 3S ARMOR

Ultralight puncture and casing protection

ROAD HAZARD REPLACEMENT

A one-time 50% off MSRP replacement if you puncture or tear a tire while riding.

RUBBERFORCE S

The fastest compound synthesized for maximum speed and grip for road racing.

TORCHBEARER

The Torchbearer offers versatile performance in a variety of road conditions. Our progressive tread design provides excellent grip and handling to support your town-line sprint while providing low rolling resistance for long days in the saddle. The Stage 4 Armor and Stage 4S Armor flat protection provides all-weather-ready puncture and tear protection from bead to bead, and the 120 TPI construction delivers a responsive ride no matter the pavement condition. The Torchbearer is available in Tubeless Ready and tube type constructions with black sidewalls.

ROAD HAZARD REPLACEMENT

A one-time 50% off MSRP replacement if you puncture or tear a tire while riding.

RUBBERFORCE S

The fastest compound synthesized for maximum speed and grip for road racing.

LAMPLIGHTER

The Lamplighter is our modern E-bike and city performance tire designed to get you anywhere with ease - thanks to its Rubberforce R compound that balances speed, traction, and reliability. The Stage 7 Armor construction makes it nearly impervious to flats while our progressive tread pattern provides traction across varied pavement and light trail surfaces. The continuous center section is road-bike-fast, with micro-siping to clear water and improve wet traction and cornering. The Lamplighter is available in tube type construction with black sidewalls.

--------	-------	----------------

KIMBERLITE

For fast adventures on both pavement and gravel, look to the Kimberlite tire. This go-anywhere tire performs like a road tire on pavement and hooks up on hardpack dirt surfaces. The semi-slick tread starts with a smooth center for decreased rolling resistance on smoother surfaces, transitions thru progressively more aggressive zones for maximum lateral traction, and wraps up with robust edge knobs for dependable cornering. The Tubeless 120 TPI casing provides the ultimate construction for speed and comfort, and the Stage 5S Armor provides a tire that is lighter, faster, and more cut, tear, and abrasion resistant. The Kimberlite is available in Tubeless Ready construction with sidewall color choices of black, tan, and brown.

GRIP INTENSITY

AGGREGATE

The Aggregate is the optimal all-around tire for paved, hardpack, and light gravel terrain. The evenly spaced knobs speed over smoother surfaces with minimal vibration while their hexagonal shape provides predictable handling over looser conditions. That is combined with our signature Rubberforce G tread compounds for impressive grip in the dirt and the new Stage 5S Armor construction offers both supreme ride quality and abrasion resistance. The Aggregate is available in Tubeless Ready construction with sidewall color choices of black, tan, and brown.

GRIP INTENSITY

UDDEN

The Udden features tightly-spaced, low-profile center knobs with aggressive cornering tread for an efficient tire that works well across hardpack, dirt and gravel. The Udden is suited for long days of exploration and lining up on next corner where anything could be around the next corner. As the results of years of R&D we have created the specially-tuned Rubberforce G tread compound and Stage 5S Armor construction giving the Udden impressive grip in the dirt and improved ride quality and abrasion resistance. The Udden is available in Tubeless Ready construction with sidewall color choices of black, tan, and brown.

GRIP INTENSITY

WENTWORTH

The Wentworth features an innovative tread design that is both fast-rolling and mud-clearing for riding through the worst conditions without sacrificing pedaling efficiency on hardpack. The central chevrons provide straight-line speed, while the widely spaced side knobs allow you to carve through ruts and damp corners while powering through slippery transitions. Combined with our signature Rubberforce G tread compound and new Stage 5S Armor construction, this tire provides impressive grip in the dirt and improves both ride quality and abrasion resistance compared to its predecessor. The Wentworth is available in Tubeless Ready construction with sidewall color choices of black, tan, and brown.

GRIP INTENSITY

KRUMBEIN

The Krumbein is American Classic's most aggressive gravel tire ideal for gravel roads, loose trails, and fast singletrack. The all-weather design includes tall side lugs for cornering grip on loose and rocky conditions, chamfered center knobs minimize rolling resistance, and there is plenty of space between knobs to prevent mud build-up. Combined with our signature Rubberforce G tread compounds and Stage 5S Armor construction, this tire provides impressive grip in the dirt and improves both ride quality and abrasion resistance compared to its predecessor. The Krumbein is available in Tubeless Ready construction with sidewall color choices of black, tan, and brown.

GRIP INTENSITY

TECTONITE

The Tectonite front-specific tire relies on a directional tread that includes ramped center knobs, angled shoulder lugs, and alternating transition knobs to provide numerous angles of traction for consistent and reliable cornering no matter how hard you push into the turn. For optimal performance pair the Tectonite with a Basanite tire on the rear wheel.

The Tectonite is available in both Trail and Enduro versions with casing, construction, and tread compounds specific to the intended use. Trail models feature our Stage TR Armor construction for efficient climbing, predictable cornering, and long days on singletrack. Enduro models feature our Stage EN Armor construction for a tire that provides grip through blind corners, confidence over rock gardens, and the ability to cruise back up the trail. Both Stage TR Armor and Stage EN Armor constructions are Tubeless Ready.

TECHNOLOGY

TUBELESS READY

Ultimate construction of speed, comfort and flat protection.

ROADHAZARD REPLACEMENT

A one-time 50% off MSRP replacement if you puncture or tear a tire while riding.

STAGE EN ARMOR

Enduro-Rated construction for higher speeds on aggressive terrain

STAGE TR ARMOR

Lightweight Trail-Rated construction with an aggressive tread for dry and rocky terrain.

BASANITE

Loose berms, choppy trails, and rugged rock gardens stand no chance against the Basanite. The Basanite is designed as a rear tire with ramped knobs for improved speed that alternate in shape and size for braking control. Alternating shoulder lugs and central knobs provide grip at any angle. The large knobs all include hatch marks, or cupped profiles, improving grip on harder-packed terrain.

The Basanite is available in both Trail and Enduro versions with casing, construction, and tread compounds specific to the intended use. Trail models feature our Stage TR Armor construction for efficient climbing, predictable cornering, and long days on singletrack. Enduro models feature our Stage EN Armor construction for a tire that provides grip through blind corners, confidence over rock gardens, and the ability to cruise back up the trail. Both Stage TR Armor and Stage EN Armor constructions are Tubeless Ready.

TECHNOLOGY

TUBELESS READY

Ultimate construction of speed, comfort and flat protection.

ROAD HAZARD REPLACEMENT

A one-time 50% off MSRP replacement if you puncture or tear a tire while riding.

STAGE EN ARMOR

Enduro-Rated construction for higher speeds on aggressive terrain.

STAGE TR ARMOR

Lightweight Trail-Rated construction with an aggressive tread for dry and rocky terrain.

MAUKA

Mauka is Hawaiian for “toward the mountain” and that’s where this tire excels. This all-condition tire climbs like a cross-country tire and descends like a trail tire. We’ve engineered a downcountry tire that rips up long climbs and provides grip and confidence on descents by combining a fast-rolling center tread with sturdy side lugs, and our lightweight Stage TR-L construction. This is topped off with our signature Rubberforce G tread compound for impressive grip in off-road conditions. The Mauka is available in a Tubeless Ready construction with black sidewalls.
