

AMERICAN CLASSIC

A CLASSIC IS REBORN

BICYCLE TIRE RANGE 2021

AMCLASSIC.COM

AMERICAN CLASSIC AND INNOVATION

American Classic exemplifies the pinnacle of performance bicycle engineering and innovation. In 1982, Bill Shook, the founder of American Classic left the beaten path to seek new and innovative ways to improve bicycle technology with the single-minded purpose of making bicycle sport enjoyable for all.

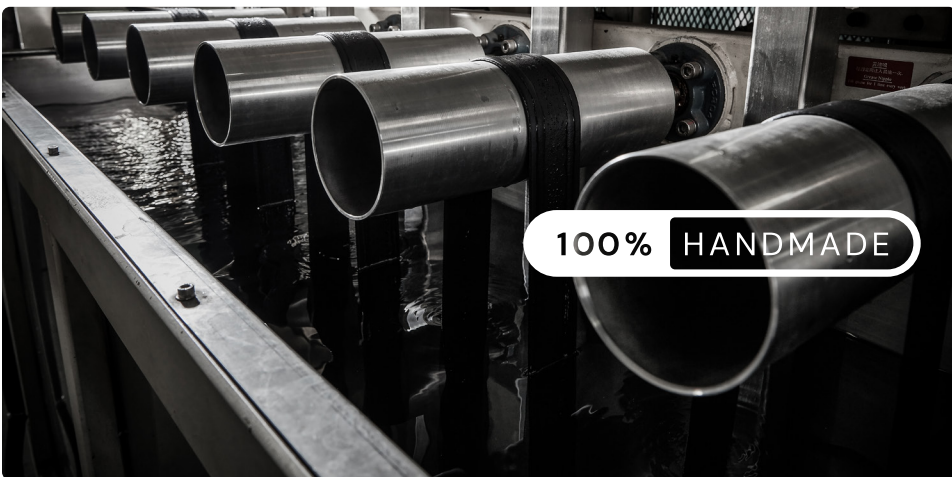

A global search for the finest production facility led American Classic to start its own manufacturing in 1996. The singular focus on every product detail fast-tracked American Classic to become a leader in the aftermarket.

Now American Classic is back with a complete line of tire products. Through its research and development in rubber technology, American Classic can once again push forward its innovation that exceeds all expectations.

PRECISION ENGINEERING

American Classic is the leading technology solution provider, and it continuously leverages its expertise in precision engineering to integrate its unique manufacturing systems with emerging technologies. By capitalizing on its expertise in material technology, rubber compounding, structure analytics, and process engineering, American Classic maximizes value-creation for riders around the world.

TIMEKEEPER

The Timekeeper is our premier road racing tire. Utilizing our signature Rubberforce S tread compound, the Timekeeper is the fastest rolling tire in the American Classic road collection. With lightning-fast straight-line speed and a confidence-inspiring cornering, the Timekeeper can help you set your next segment PR and climb the ranks of the weeknight crit. The 120 TPI construction and Stage 3 flat protection make for a supple and smooth-riding tire that can fend off common puncture hazards. The Timekeeper is available in Tubeless Ready and tube-type constructions with sidewall color choices of black, tan and classic brown.

TECHNOLOGY

TUBELESS READY

Ultimate construction of speed, comfort and flat protection.

STAGE 3 FLAT PROTECTION

Ultralightweight puncture protection to keep you rolling fast.

ROAD HAZARD REPLACEMENT

A one-time 50% off MSRP replacement if you puncture or tear a tire while riding.

RUBBERFORCE S

The fastest compound synthesized for maximum speed and grip for road racing.

TORCHBEARER

The modern road standard. The Torchbearer offers versatile performance in a variety of road conditions. Our progressive tread design guarantees excellent grip and handling to support you to win the town-line sprint on dry and wet roads. The Stage 3s flat protection provides all-weather-ready puncture and tear protection from bead to bead, and the 120 TPI construction delivers a responsive ride no matter the pavement condition. The Torchbearer is available in Tubeless Ready and tube-type constructions.

RUBBERFORCE S

The fastest compound synthesized for maximum speed and grip for road racing.

LAMPLIGHTER

Conquer the city commute. The Lamplighter is our modern E-bike and city performance tire designed to get you anywhere with ease - thanks to its Rubberforce R compound that balances speed, traction, and reliability. The Stage 7 flat protection makes it nearly impervious to flats. Our progressive tread pattern provides traction across varied pavement and light trail surfaces. The continuous center section is road-bike-fast, with micro-siping to clear water and improve wet traction and cornering. The Lamplighter is available in tube-type construction with sidewall color choices of black, tan, and classic brown.

AGGREGATE

The maverick gravel adventure. The Aggregate is our adventure road and gravel tire, created for minimal road vibration and consistent traction. The evenly-spaced, hexagonal knobs provide predictable handling across the pavement, hardpack, dirt, and gravel terrain. Our signature Rubberforce G compound is designed to hook up in dirt from East to West, with Stage 5S flat protection and Tubeless Ready casing for maximum puncture protection to keep rolling across almost anything. The Aggregate is available in Tubeless Ready construction with sidewall color choices of black and tan.

GRIP INTENSITY

UDDEN

Aggressive, mud-shedding speed. The Udden features an innovative, fast-rolling, mud-clearing tread design for riding through the worst conditions without sacrificing pedaling efficiency on hardpack. The central chevrons provide straight-line speed, while the widely spaced side knobs allow you to carve through ruts and muddy corners and power over the top of slippery transitions. The Udden is a versatile tire – air them up for the pavement ride out of town, and let it down to a lower PSI for improved traction when the county service ends. Our Stage 5S flat protection and the Tubeless Ready 120 TPI casing will keep you rolling through the harshest conditions. The Udden is available in Tubeless Ready construction with sidewall color choices of black and tan.

GRIP INTENSITY

WENTWORTH

Road to trail and back, ready for anything. The Wentworth features tightly-spaced, low-profile center knobs with aggressive cornering tread for an efficient tire that works well across hardpack, dirt, and gravel. The Wentworth is suited for long days of exploration and lining up on rainy race days where anything could be around the next corner. The fully-ply Stage 5S flat protection and the Tubeless Ready 120 TPI casing helps to keep the miles rolling through harsh gravel conditions. The Wentworth is available in Tubeless Ready construction with sidewall color choices of black and tan.

KRUMBEIN

Singletrack-ready, boundless gravel. The Krumbein is ideal for gravel roads and any singletrack trail that may lie around the corner. The aggressive side lugs provide the ultimate cornering grip across loose and muddy transitions, while the chamfered center tread minimizes rolling resistance without sacrificing off-road traction. The Tubeless Ready 120 TPI casing with our full-ply Stage 5S flat protection provides a responsive riding tire that can fend off most punctures and tears. The Krumbein is available in Tubeless Ready construction with sidewall color choices of black and tan.
