

## Mountain Spoke Lengths Page 1 - Current (2014-2015)

- Spoke lengths are calculated using American Classic nipples. If you are using any nipple other than an American Classic nipple, you MUST subtract 2mm from the length listed below.
- If wheels have brass nipples, do not subtract 2mm from length listed below.
- Please NOTE: MTB front hubs Disc 130 (QR, 15mm Thru-Axle, and 20mm Thru-Axle) all have the same hub flange and spoke circle diameter, therefore they are the same spoke length. Spoke lengths are the same for PowerTap rear hubs. American Classic does not sell individual nipples, spokes or rims.
