

12ft Feather Flag & Pole Set Safety Instructions

- **⚠ Warning** Only use feather flag & pole set in area clear of power lines, structures, trees, cars, buildings, people, hazardous weather etc...
- Ensure feather flag & pole set is only used in clear open area to avoid damaging or creating hazardous situations.
- **⚠ Warning** Do not use if winds exceed 18 mph.
- Install at least 16 feet away from road.
- Do not use feather flag & pole set if showing any sign of damage. Check for damage before each use.
- Do not use aftermarket parts.
- Do not modify in any way.
- Only assemble pole components in clear open area free of any hazards.
- Do not use in dangerous environments.
- Do not force pole set pieces together. Pole pieces fit together when assembled properly.
- Use personal protective equipment such as protective eyewear and gloves when setting up.
- Only set up feather flag & pole set using secured system. Examples of secured systems include ground spike, anchored X-stand, company provided base unit, etc...
- Store feather flag & pole set indoors when not in use.

Ground Spike

- **⚠ Caution.** Do not hammer pole set receptacle hole when securing spike in ground. Only hammer solid top of the spike.
- Use rubber mallet to force spike into the ground.
- Only use if spike is hammered all the way into the ground, at minimum 20 inches, so that pole receptacle is the only component above ground.
- Only use ground spike in flat, stable, and dry ground.
- Use personal protective equipment such as protective eyewear and gloves when setting up.

X-stand

- **⚠ Warning** Only use X-stand indoors or in areas with less than 1 mph winds.
- Only use X-stand when anchored with water bag, sand bag, or other anchoring system.
- Always put washer on before tightening down the dowel with nut.
- Always operate on flat, stable, and dry surface.
- Use personal protective equipment such as protective eyewear and gloves when setting up.

12ft Feather Flag Pole Set

Step 1 :

Check to make sure all parts in the first diagram are included. Insert one of the arc pole pieces into the other until the button snaps into place. Then, slide the full arc piece into the smallest straight tube piece, until it snaps into place. Continue to insert the smaller tube into the larger tube, snapping into place each time, until all of the pole pieces have been snapped together.

Step 2 :

Slide the end of the pole arc into the sleeve of the feather flag. Slide the feather flag down until the pole arc has reached the end of the sleeve.

Step 3 :

If using a ground spike, first stick the spike into the ground by hammering the solid top of the spike (not the pole set receptacle hole), until secured into the ground. Then continue to step 5 below.

Step 4 :

If using an X Stand, place the taller leg across the shorter leg. Insert the threaded bolt of the pole set receptacle rod through both legs. Put a washer on before tightening down the bolt with the nut. Then continue to step 5 below.

Step 5 :

Insert the end of the fully assembled feather flag pole into the receptacle of the chosen base unit.

Step 6 :

Find the black loop at the bottom of the flag. Hook this onto the loop holder piece on pole# 5. Slide the loop holder up/down the pole until the flag is held firm. Tighten down the knob screw to secure.
