

5ft Feather Flag & Pole Set Instructions

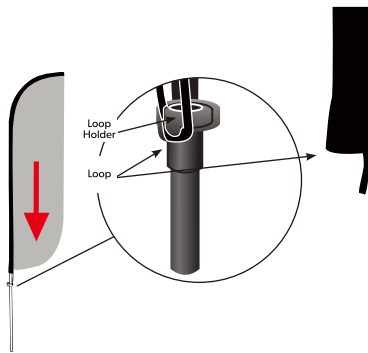

Step 1: Check to make sure all parts in the first diagram are included. Insert pole #1 (the fiberglass piece) into pole #2, and finally insert both into pole #3.

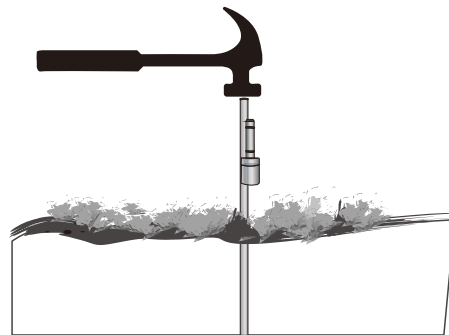

Step 2: Slide the end of the pole #1 into the sleeve of the feather flag. Slide the feather flag down until the pole has reached the end of the sleeve.

Step 3: Find the black loop of the feather flag. Hook this onto the loop holder piece on pole #3. Slide the feather flag loop holder down the shaft of the pole until the feather flag achieves a good clean shape. Tighten down the loop holder by turning the knob clockwise.

Step 4: If using a ground spike, first stick the spike into the ground by hammering the solid top of the spike (not the pole set receptacle hole), until secured into the ground. Then continue to step #6 below.

Step 5: If using an X-Stand, place the shorter leg down, place the washer over the hole, place the longer leg on top. Insert the threaded bolt up through the bottom of the legs, screw dowel into the threaded bolt firmly but do not over tighten.

- 4. Dowel - X-Stand
- 5. Bolt - X-Stand
- 6. Washer - X-Stand
- 7. X-Stand Leg - Tall
- 8. X-Stand Leg - Short

Step 6: Insert the end of the fully assembled feather flag pole into the receptacle of the chosen base unit.
