## KEY FEATURES

-  Leverage the game changing properties of liquid CO<sub>2</sub> to harness the power of Cryo-Trim<sup>®</sup> and Cryo-Sieve<sup>®</sup> to preserve more cannabinoids and terpenes than any other machines
-  Quick change removable, washable, interchangeable, and replaceable drum screens for increased convenience, yield, and productivity
-  Ultra durable food grade ABS chassis and clear PETG workstation lid built for daily usage, dependable performance, and easy cleaning
-  UL-listed, heavy-duty motor that's engineered to go the distance and is available in 120/240v as well as overseas configurations
-  Intuitive switch toggle and variable speed control for simple, no-fuss operation that is easy to dial in to your exact needs
-  Optimize efficiency and throughput with a secondary drum kit for rapid reloading
-  EU GMP, CE, CSA, UL, and ISO9001 ready for compliant use almost anywhere

\* Wet trimming and fresh frozen Cryo-Sieve<sup>®</sup> processing for solventless applications requires a freeze dryer for optimal final results
