MODULES

Vantage kitchens are constructed from configurable, interchangeable, 120cm length modules. 60cm corner modules allow you to configure your kitchen to your space.

Shelf Cabinet

A key building block for any outdoor kitchen. The cabinet features a 40mm solid iroko shelf. Exposed on all sides, this seam of iroko features throughout the kitchen.

Carbon Steel Doors are optional, and open downwards with a smooth gas hinge system. See p20 for more details.

Bar Table & Blaze Barstools

The Bar Table with its proprietary Vantage Blaze Barstools is a stunning feature. An exposed structural iroko beam runs between the Rear Fascias, continuing the seam of iroko through the kitchen.

The barstools are crafted from a single piece of aluminium, and finished with the same textured surface as the carbon steel.

Corner module

Used to turn your kitchen into an L- or U-shape, or simply as an attractive end-unit to a run of kitchen.

PLANTER

Plant up the Corner Module as a herb garden, useful for cooking and cocktails. Or plant it up with decorative low-maintenance shrubs.

CUBE ICE WELL

The Cube stainless steel Ice Well sits in the top of the corner module, and comes with lid, drainage hole and plug.

BARBEQUES & APPLIANCES

The Chef's Anvil

The Chef's Anvil is the perfect centrepiece for any outdoor kitchen. A wood-fired barbeque, its broad steel cooking ring will cater for a crowd, whilst providing a dramatic conversation piece.

Bull Gas Grill Station

Bull is a reputable American grill manufacturer, known for their build quality. This powerful 4-burner grill has chunky steel grill grates for giving an exceptional sear, and is available in plumbed-in or bottled gas variants.

The Grill Station can be specified without a Feature Wall or with a heatproof feature wall; Porcelain or Carbon Steel.

Gusto

Our take on the well-established kamado barbecue style. The Gusto runs on charcoal and allows superb temperature control.

It sits on a 60cm square low pedestal with an integrated heatproof porcelain top.

DeliVita Pizza Oven

DeliVita's stylish, compact, wood-fired pizza ovens are handmade in Yorkshire. Perfect for families, foodies, and fire-lovers, the oven punches well above its weight: It's ready to cook in just 25 minutes, and can cook a pizza in 90 seconds. This wood-fired oven can be placed on any Vantage kitchen cabinet, bar table, or fridge cabinet.

Fridge & Bin Cabinet

Keep your drinks cool and on hand with an outdoor-rated fridge. The pivoting storage bin can be used for charcoal, firelighters, and other items that need protecting from the elements.

Tarn Sink

The Tarn sink is a stunning matt black ceramic sink that can be ordered for any 120cm cabinet unit. Supplied with black metal Tarn mixer tap and black trap and waste piping.

DESIGN OPTIONS

A number of design options are available for you to customise your kitchen to your tastes.

Feature Wall

Most kitchen units can be specified with or without a Feature Wall. Our diverse range of Feature Walls enable you to dramatically alter the appearance

of your kitchen. The Carbon Steel and Porcelain Feature Walls are heatproof and can be used behind the gas grill.

CARBON STEEL

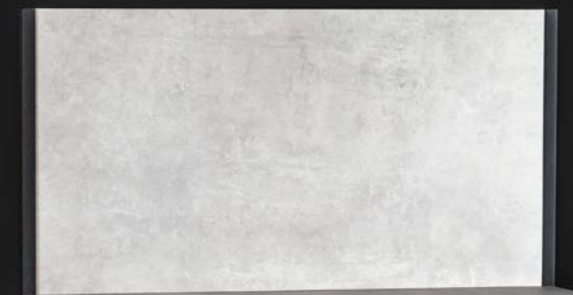

CARBON STEEL with TOOLRAIL

CARBON STEEL with FLOATING SHELF

PORCELAIN

CARBON STEEL with IROKO INLAY

CARBON STEEL with IROKO INLAY & TOOLRAIL

MILLBOARD DRIFTWOOD

MILLBOARD EMBERED

Millboard Feature Wall

Millboard is a premium composite board used in many landscaping projects for decking, steps, cladding etc.

Millboard's Weathered Oak range gives a dramatic backdrop to any outdoor kitchen, and allows you to match your kitchen with your decking area.

Millboard Weather Oak 200mm planks fit our Feature Wall system perfectly. Other Millboard ranges can be adapted to fit by trimming to size.

Rear Fascia

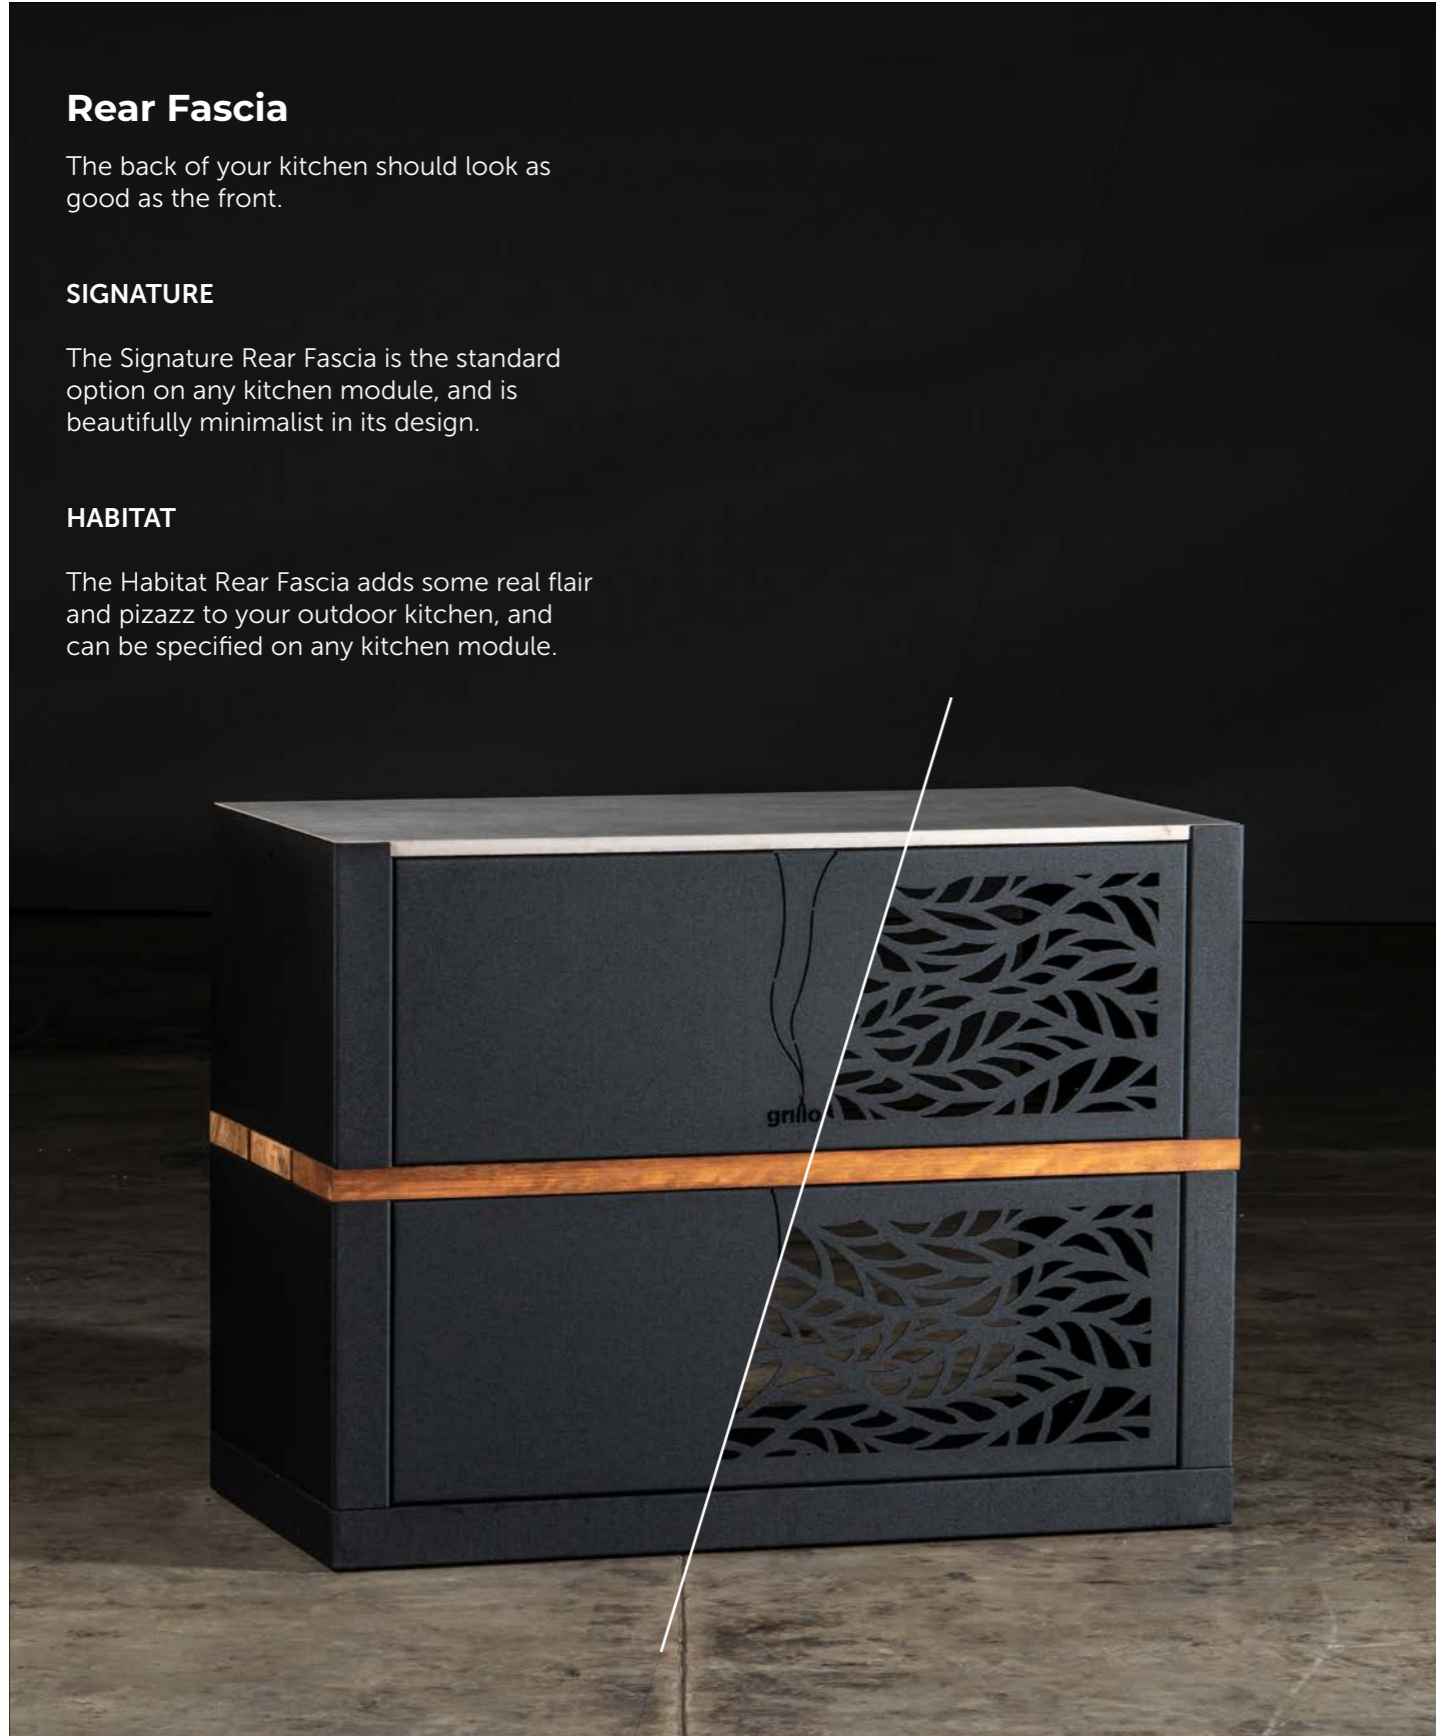

The back of your kitchen should look as good as the front.

SIGNATURE

The Signature Rear Fascia is the standard option on any kitchen module, and is beautifully minimalist in its design.

HABITAT

The Habitat Rear Fascia adds some real flair and pizzazz to your outdoor kitchen, and can be specified on any kitchen module.

Cabinet Doors

Our design team were determined that the Vantage would look amazing with or without doors. Vantage cabinet doors open downwards damped by a smooth gas-hinge.

ACCESSORIES

Crates

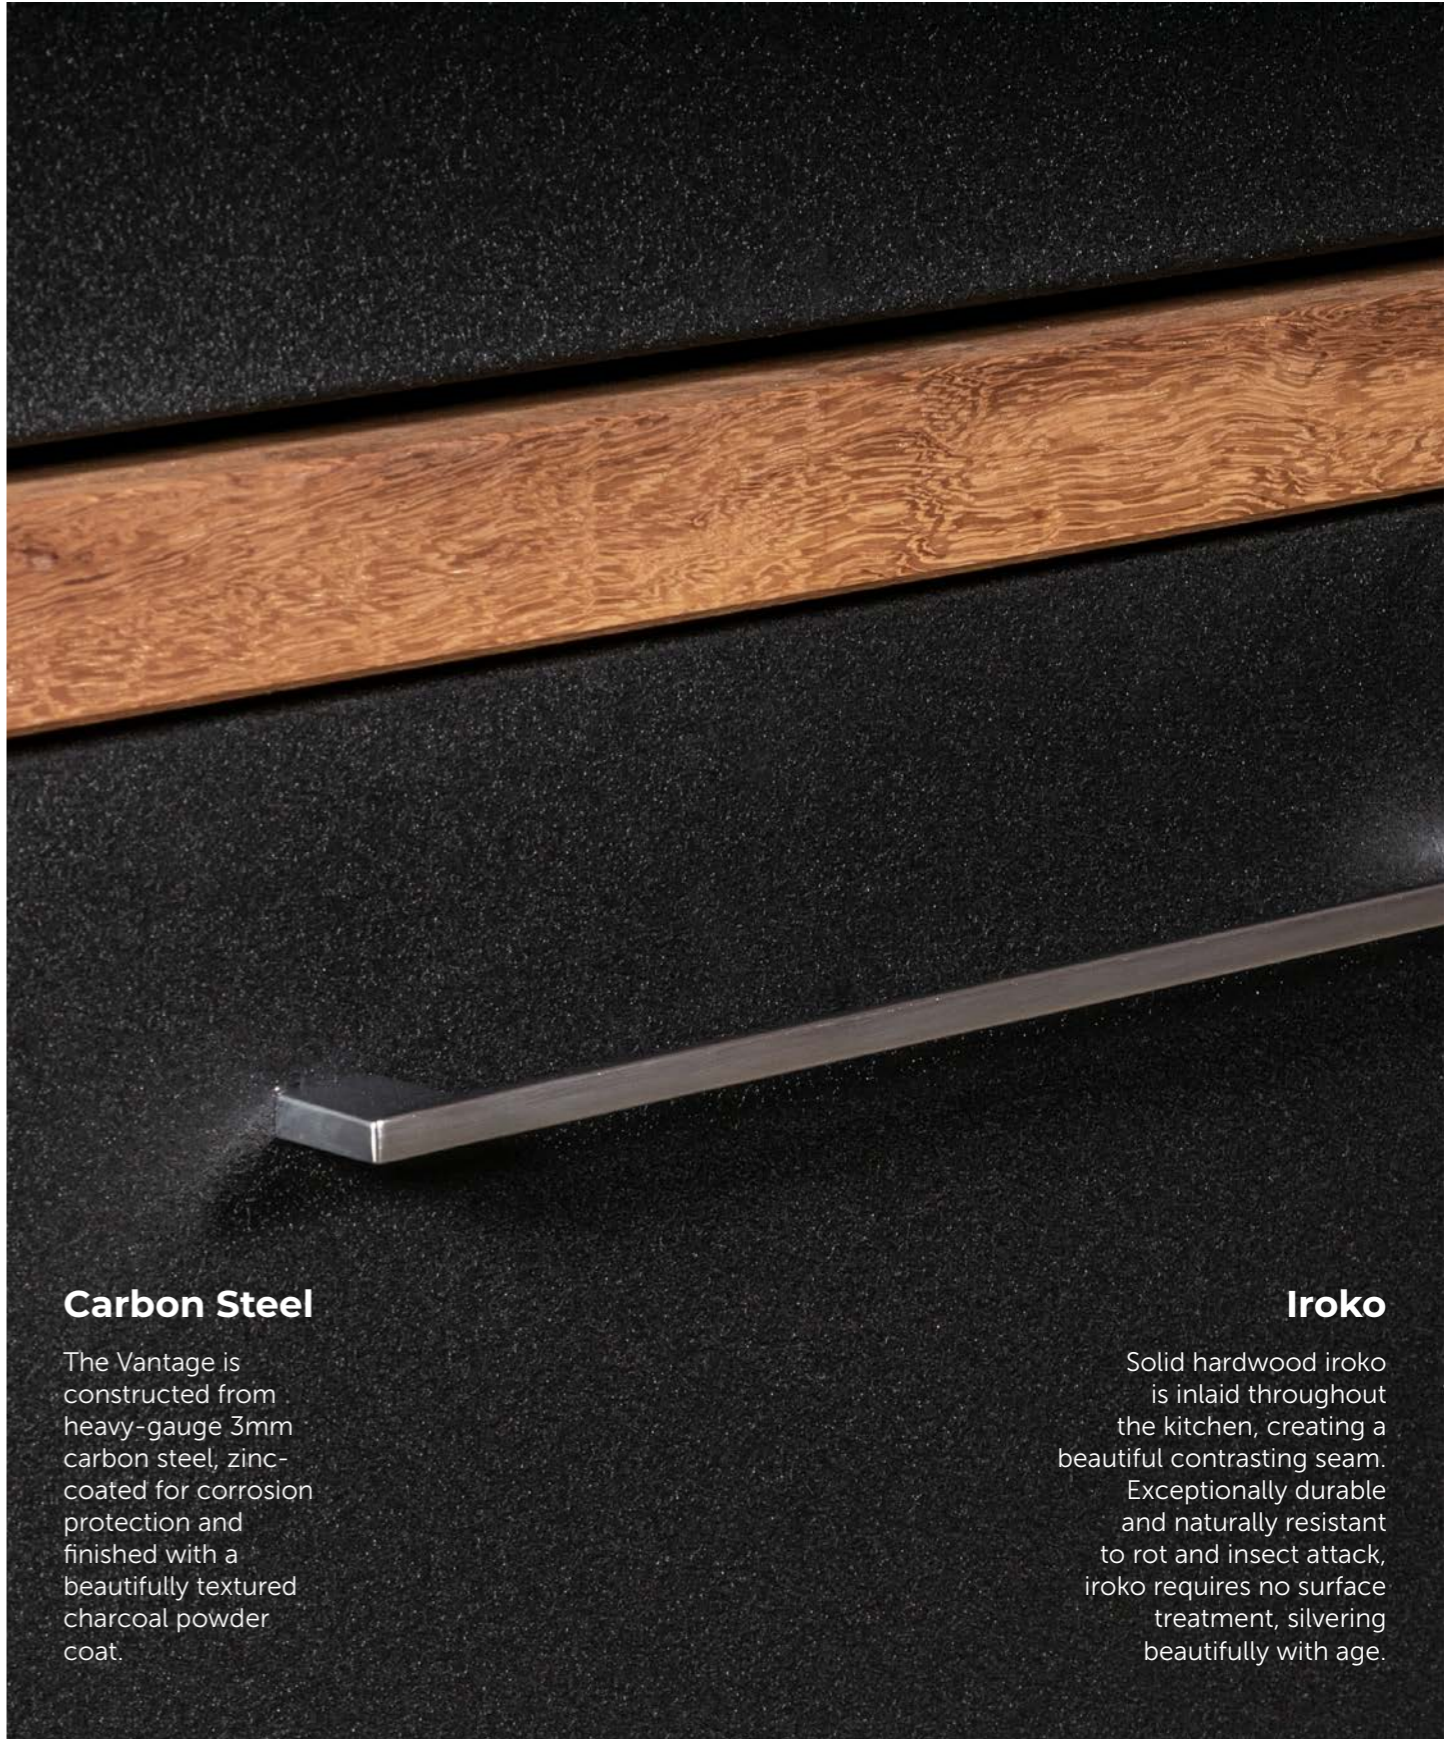

Use our ebony-coloured wooden storage crates to organise your barbecue gear. A beautiful finishing touch if you are specifying shelf cabinets without doors.

Toolrails

Toolrails attach to the joining holes at the end of any kitchen section. They can be used instead of a corner module to finish a run of kitchen. Tongs and hooks not included.

MATERIALS

Carbon Steel

The Vantage is constructed from heavy-gauge 3mm carbon steel, zinc-coated for corrosion protection and finished with a beautifully textured charcoal powder coat.

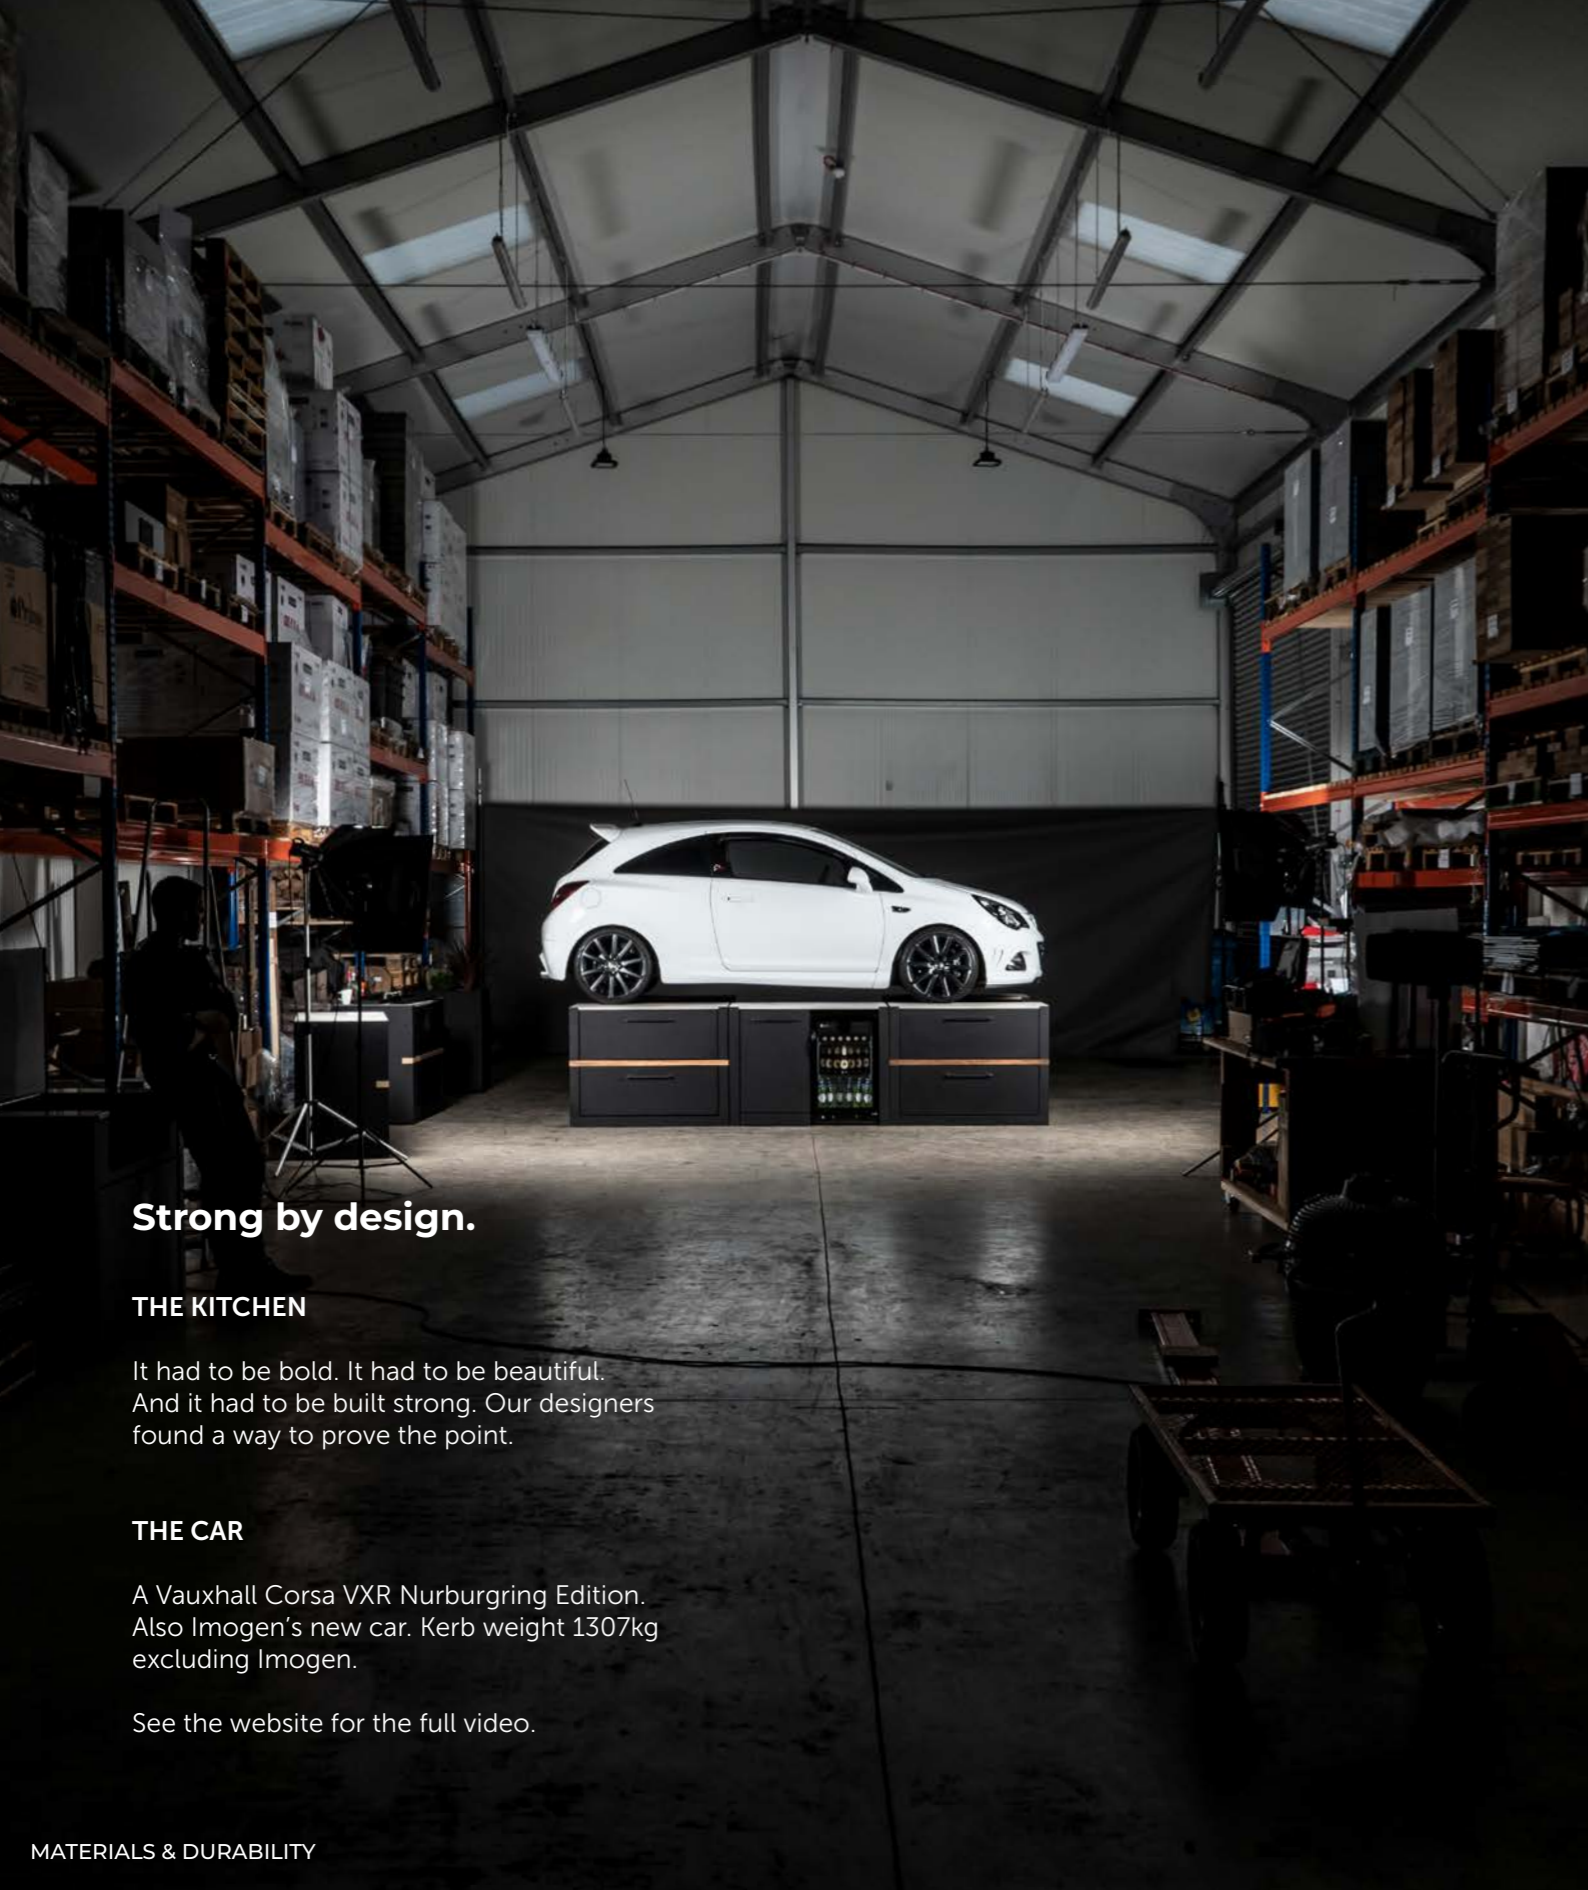

Iroko

Solid hardwood iroko is inlaid throughout the kitchen, creating a beautiful contrasting seam. Exceptionally durable and naturally resistant to rot and insect attack, iroko requires no surface treatment, silvering beautifully with age.

Porcelain worksurface

The Plateau porcelain worksurfaces are incredibly hardwearing. In addition to being immensely strong (see p28), they are heatproof, stainproof, weatherproof, scratchproof, and non-bleaching.

Strong by design.

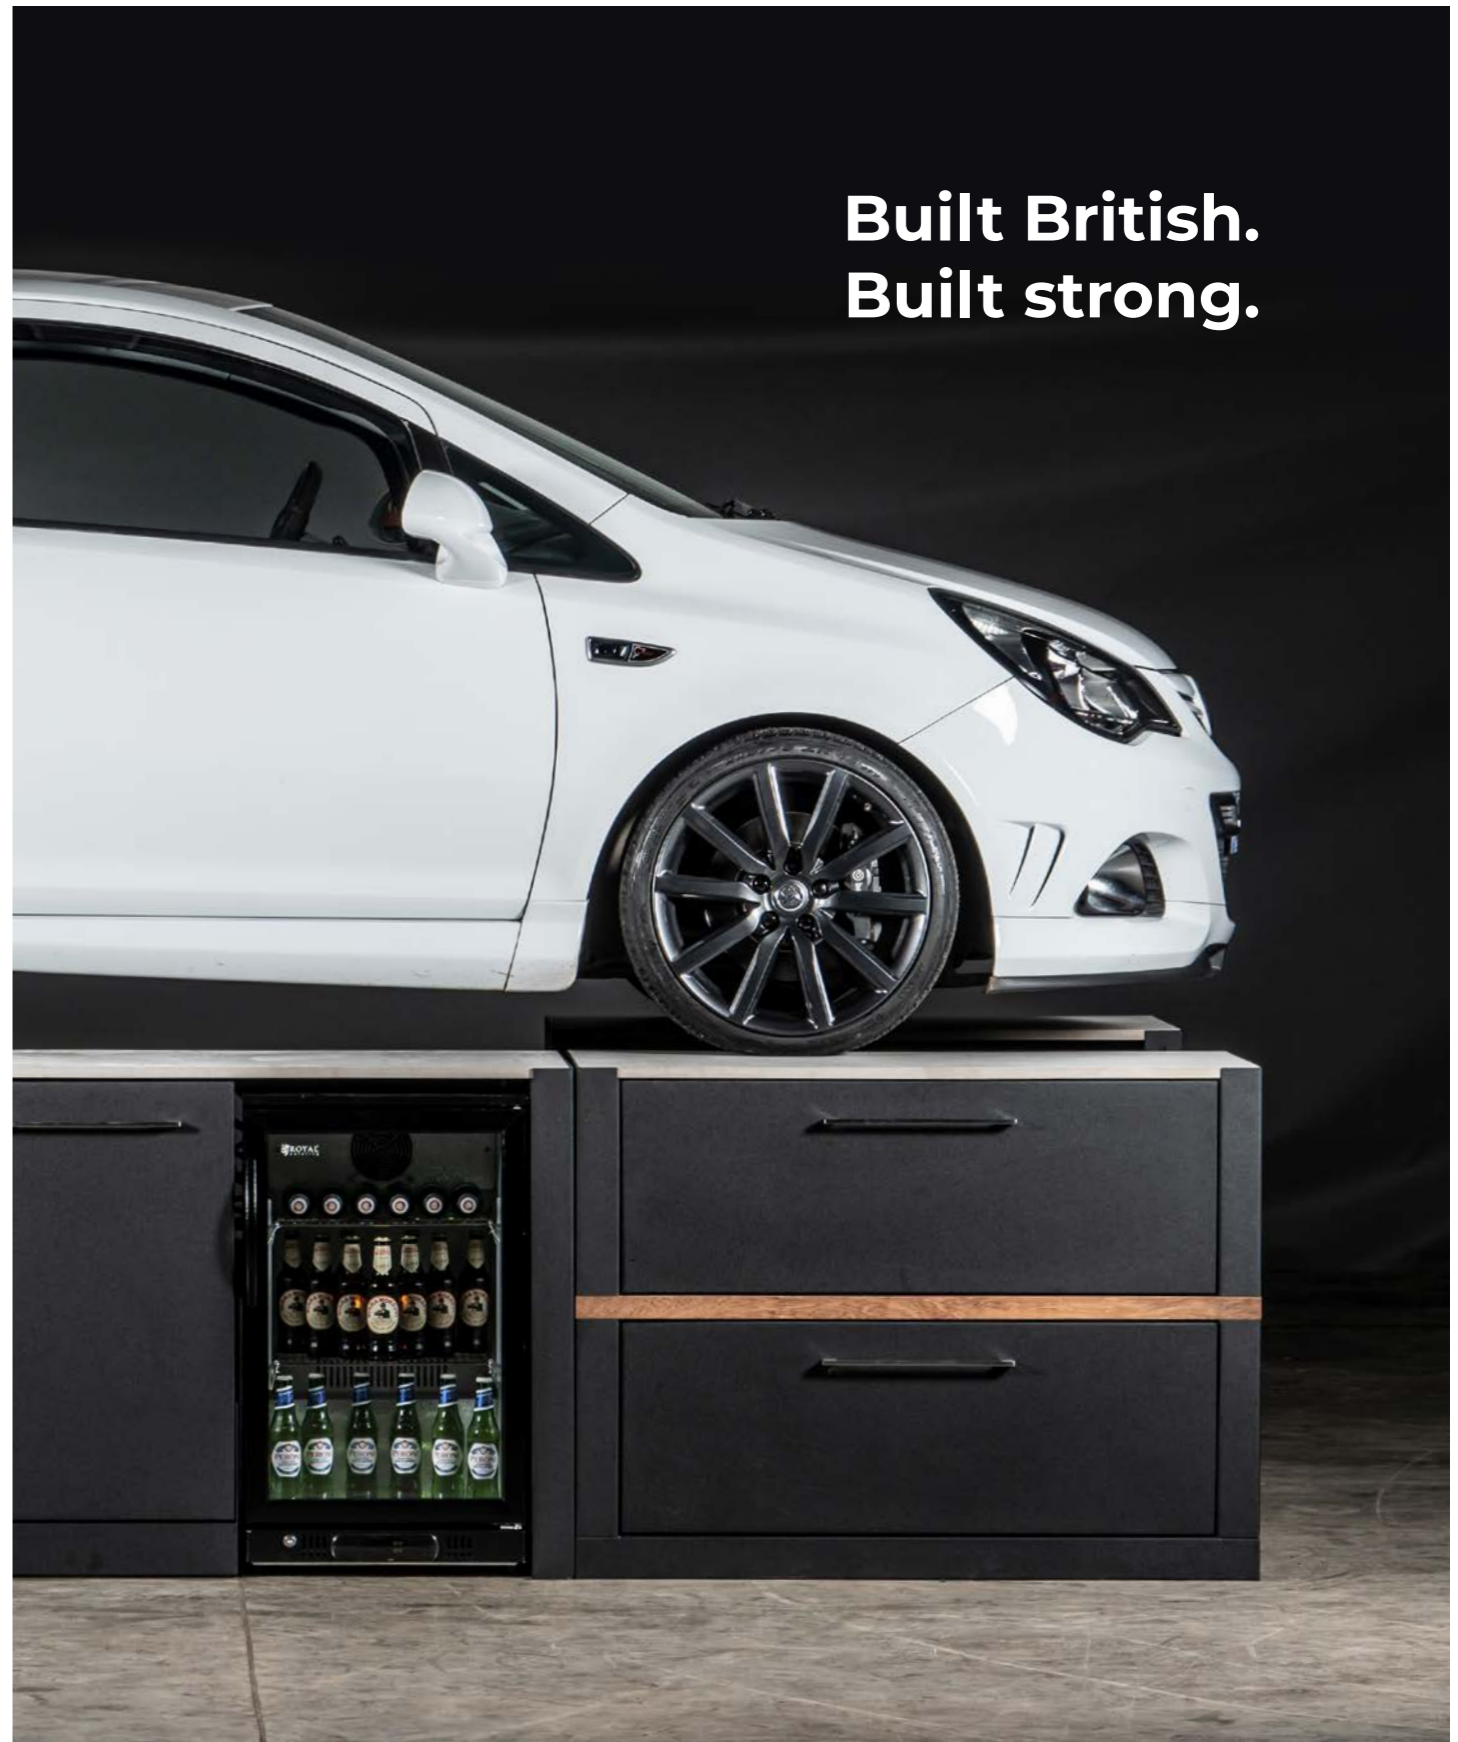

THE KITCHEN

It had to be bold. It had to be beautiful.
And it had to be built strong. Our designers
found a way to prove the point.

THE CAR

A Vauxhall Corsa VXR Nurburgring Edition.
Also Imogen's new car. Kerb weight 1307kg
excluding Imogen.

See the website for the full video.

**Built British.
Built strong.**
