

Aquabox is our RotaKids project for the school year 2022/2023

Rotary
Club of Retford

Did you know that over 800 million people in the world have no access to clean drinking water?

AquaBox is a charity that provides water pumps and essential items, in moments of crisis or disaster, to communities around the world. Communities that no longer have water that is safe to drink.

Would you like to see an AquaBox water pump change dirty water into clean drinking water? Perhaps you would like to create some 'dirty water' from items around your school. You might want to mix soil, oil, clay, garden waste, with pond water or something equally undrinkable! We can then demonstrate how the pump works at an assembly or in a classroom situation.

Water is crucial to the survival of all living things. Other than water, what else do you think you might need if you lost your home and did not have any money, electricity, transport or possessions?

Compile a list before our visit and we can compare your ideas with those supplied in the AquaBox survival kit.

Perhaps your school might like to organise some fundraising to pay for an AquaBox that can be sent out to a community or family in need.

Please contact your RotaRep to arrange a date for us to visit, or for more information.
