

TALK RUBBISH SPRING TERM 2022

We know you don't really!! In fact young people, like yourselves, can have a big say in what our future planet should look like.

Perhaps you could organise regular litter picks in your school or local community.

Or, how about designing posters to display around school or in the local area? Your focus could be on recycling, picking up litter or other ideas to reduce pollution.

Put together a presentation encouraging people to get rid of their rubbish responsibly. This presentation could then be shared with your class, school or family.

Create a catchy 'pick up litter' slogan to share on the RotaKids website and our Rotary Facebook page.

Of course, you may have your own ideas.....
