

## Transmission Crossmember Installation Tips

- This crossmember utilizes a standard 2 bolt “GM” style transmission mount. G Force part number GMTM for standard height, or GMTM-S for short version.
- This Polyurethane mount goes between the crossmember and each adapter.
- Chose which adapter is used with your transmission.
- The adapters are bolted directly to the transmission
- **Note:** moderate transmission tunnel massaging will be required.
- **Note:** minor case trimming will be required.

Fits NAG1 and 8HP70 Transmissions

Fits A727 Transmission
