

Watermelon Fragrance

100% Natural • 99% Biodegradable

INCI: Fragrance (plus any allergens)

Get ready to make your products glow with this 100% natural watermelon fragrance! Inspired by the juicy scent of a popular K-Beauty Brand, Watermelon Fragrance is reminiscent of freshly picked, candied watermelons. Ultra yummy!

Top notes of lemon, coriander, and mint provide green refreshness, while bottom notes of peach, tiare flower and orrisse bring a delectable sweetness for a balanced watermelon blend reminiscent of summertime.

What makes it natural? Natural fragrance extracts are blended together in a natural solvent to create the perfect scent. Each fragrance extract is considered 100% natural based on the ISO 9235 Standard, which is the international standard on aromatic natural ingredients. Natural doesn't always mean biodegradable, but we're proud to share that our Watermelon Fragrance is also 99.08% biodegradable.

did you know?

Diethyl phthalate (DEP) is safe for use in fragrances and does not pose known risks for human health. It has a long history of use and a substantial safety profile. There are no other phthalates used in the fragrance industry. This fragrance does not contain DEP.

Formulation Guidelines

Every formula differs in whether or not you will need a solublizer to incorporate this formula into your product. Please conduct testing alone and with various solublizers before using. It is ideal to avoid heat when incorporating fragrances, adding below 110°F.

Applications

All cosmetic applications for hair and skin. Candle safe, but not tested. Not suitable for lip care.
