Hk+np studio's jewelry designs evolve from sketches to computer and plastic models, and finally land in the hands of the skilled silversmith where they are carefully cast and polished. With an emphasis on design, detail, and craftsmanship, the designs of hk+np studio establish a unique expression in contemporary jewelry. Designed in Vancouver / Hand Crafted in Japan.

**“the horizon beyond”** The infinity series arose while gazing over English Bay towards the horizon. The horizon extends beyond the bounds of imagination, as limitless as the night sky.

**“To live in clover”** A fond memory of our childhood was to visit the park in search of the elusive and lucky four leaf clover. This memory reminds us of a more carefree time in our lives which we capture in our new clover series. This series will hopefully also make you feel youthful, lucky, and care free!
