

WARNING

- Do not install the product to a ladder shaped luggage carrier. (Fixing plate may deform due to the carrier and there is a chance of child seat breaking off from the carrier.)
- Suitable for children weighing up to the load capacity of the luggage carrier minus the child seat weight.
- Please follow the limit of weight as written on the luggage carrier.
- If there is a lock around child during usage, the lock may operate. Please be careful of a position to install.
- Please be careful for seat belt not to go around child's neck.
- When riding, please avoid from sudden braking and handling.
- Never ride on a bad road or do tricks with a bicycle.

For your child's safety, please be sure to install the dress guard to your bicycle. When the bicycle is not with a dress guard, please install a dress guard which would protect feet from implicating.

CAUTION

- Install a child seat where rider's heel does not interfere with the child seat.
- Be sure that rear reflex reflector could be seen from the behind.
- Please be sure that your child wears shoes when riding.
- Please use a seat belt (crotch and waist belt) when riding your child.
- Please be careful your child not to sleep when riding.
- Please be careful that seat belt not to implicate with the wheel.
- Do not let child seat exposed to rain.
- Please check if bicycle is able to install the child seat from the indication on the bicycle and/or instruction manual. If there is no label, the bicycle is not able to install a child seat. If the bicycle is not sure of application, please ask nearby bicycle shops for assistance.
- When letting your child off from the bicycle, please do so where the ground is flat and with the bicycle locked.

- When your child is riding child seat, please be careful that your child is holding on to the handle of a child seat.
- Keep away from fire and heat.
- Wipe off with a wet cloth when dirty. Do not use benzene or thinner to clean.
- The life of seat belt is about 2 years. Please change them periodically for a safe use. (Seat belt is not free of charge)
- Be sure to keep the road traffic laws.
- The SG mark system is a compensation system for accidents resulting in injury or death caused by a defective child seat. (Valid for 3 years from the date of new purchase)
- Seating a 6-year or older child in the child seat violates the Road Traffic Law, which may make it ineligible for compensation by the SG mark system.
- Compensation by the SG mark system may not apply if the bicycle is not one appropriate, if the child is not within the suitable range, and/or if descriptions in the instruction manual have not been followed.
- SG Mark compensation system is valid only in Japan.

Parts structure

Body 1pc.	Footrest Right/Left 1pc. each	Step fixing flat washer 4pc.	Step fixing screw (long) 2pc.	Step fixing screw (short) 2pc.	Fixing plate 2pc.	Fixing screw 4pc.
-----------	-------------------------------	------------------------------	-------------------------------	--------------------------------	-------------------	-------------------

Safety belt 1set

Assembling/Installing Method

① Attach the footrests to the body and fix them with step fixing screws and step fixing flat washers.

② Attach safety belt to the body.

③ Pull up the seat cushion and place the child seat on the luggage carrier. Once decided on the fixing position, clamp the child seat and luggage carrier with fixing plates and screws. Put the seat cushion back into place.

CAUTION When child seat is installed to 24" bicycle or smaller, there is a possibility that ankle of a rider crash with the footrest. Please be careful of this when attaching.

IMPORTANT: Using the inside part or outside part of fixing plate will have no effect on safety. Please use holes with painted black.

Do not fix the screws on only one side.

Be sure to check the child seat is not interfering with the rear reflex reflector.

④ Bind the safety belt around seat post and attach the buckles. Safety belt holds the child seat in place when luggage carrier is broken by accident.

Do not leave the safety belt hanging from the child seat.

CAUTION Use the adjuster to adjust the length of the belt. Also, do not ride when buckle is free.

How to use the seat belt CAUTION: Please be sure that the seat belt is not twisted.

Taking Off Push the red buckle and pull to take off.

Fastening the Belt Insert the red buckle to the grey buckle.

Adjusting the Belt Shorten: Pull the belt towards to shorten. Extend: Push the belt towards to extend.

Using as basket By moving the side guard, this child seat could also be used as temporary rear basket.

After installing the child seat, make sure that it is stable and does not rattle before you ride.
