

PRODUCT INFORMATION: PRO-C SKIN BRIGHTENING CREAM

Skin Brightening Cream is an extremely effective formulation that goes deep into the skin to get to the root of the discoloration deep in the dermis. The unique blend of ingredients removes dead cells to improve penetration into the skin while improving tone, texture and discoloration. Includes Arbutin, Kojic Acid, SMA'RT Luminous TXA (Tranexamic Acid), Vitamin C, Niacinamide, Pterowhite (Pterocarpus Marsupium Bark Extract) & AHA's in an elegant cream base that works well with makeup.

Indications

- To brighten and relieve skin discoloration as it smoothes and improves the texture of rough skin with AHAs.
- For pre- and post-op surgery, i.e., laser treatment, for hyperpigmentation.
- Physically deliver brightening agents directly to the Melanocytes.

Directions

- Cleanse with a very gentle product (Neutral Cleansing Bar or Non-Drying Cleansing Lotion).
- Pat dry lightly and wait 5 minutes. Apply prior to any other products but after toner if you are using one.
- Apply a thin, even layer only to the area you want to lighten. Allow to dry. Apply sunscreen.
- Apply other items as part of your normal daily routine or as noted in the protocol schedule.
- May be used twice daily.

Warnings

- Sunscreen should be applied at least 30 minutes prior to getting into sunlight for optimum effect.
- STOP USAGE IF PREGNANT OR BREASTFEEDING.
- For external use only. Avoid contact with eyes and mucous membranes.
- Keep out of reach of small children. Not recommended for children under 12 years of age.
- A mild transient tingling may occur in people with sensitive skin. This is normal.
- If irritation develops discontinue use for 3 days. If tingling sensation continues, discontinue use.
- Do not use an alcohol-based astringent or perfume when using this product.
- Do not use for more than 4 months at a time since bleaching agents are toxic.

Ingredients

Water, Lauryl Laurate, Diethylhexyl Succinate, Niacinamide, Triolein, Tranexamic Acid, Candelilla/Jojoba/Rice Bran Polyglyceryl-3 Esters, Behenyl Alcohol, Kojic Dipalmitate, Glycerin, Tridecyl Stearate, Sodium Potassium Aluminum Silicate, Neopentyl Glycol Dicaprylate/Dicaprate, Glyceryl Stearate, Tridecyl Trimellitate, Polyglyceryl-3 Stearate, Cetearyl Alcohol, Squalane, Sodium PCA, Galactoarabinan, Pterocarpus Marsupium Bark Extract (*Pterowhite®), Arbutin, Glycolic Acid, Magnesium Ascorbyl Phosphate, Propanediol, Lactic Acid, Allantoin, Passiflora Quadrangularis Fruit Extract, Tartaric Acid, Citrus Limon (Lemon) Fruit Extract, Malic Acid, Ananas Sativus (Pineapple) Fruit Extract, Sodium Stearoyl Lactylate, Phenoxyethanol, Vitis Vinifera (Grape) Fruit Extract, Caprylyl Glycol, Xanthan Gum, Ethylhexylglycerin, Titanium Dioxide, Sodium Sulfite, Alcohol Denat., Sodium Metabisulfite, Silica.

Animal Testing

A-Cute Derm® does not perform animal testing in any manner. I am not aware of any companies that product and / or distribute products that does any in-house animal testing.

The question comes up often so let me clarify what the Food & Drug Administration (FDA) requires from the industry.

All chemical and natural ingredient manufacturers may be required to do animal testing. This may include some government labs. This does not include the actual manufacturers and distributors such as ourselves. The testing is done for the safety of the consumer...This is one of the most critical requirements established by the government for the protection of all people. It can include ingestion issues, toxicity, efficacy, claims that can be made, safety, eye sensitivity, contraindications.... There are companies that create new synthetic ingredients, there are ingredients that other countries would like the U.S. to accept.... These all require specific documentation, clinical support and testing.
