## Maple Leaf Canada 4 Panel Goose Adjustable Ground Mount | 25 years Warranty

Introducing the Maple Leaf Canada 4 Panel Goose Adjustable Ground Mount. Our unique tilting structure collects as much as 70% percent additional solar energy than typical configurations, ensuring outstanding performance in all seasons. This adjustable mounting bracket, which is appropriate with all types of solar panel's brands, is the gateway to off-grid power perfectionism, with a maximum width that can accommodate distinct setups.

The mounting system is adaptable and straightforward to install, making it ideal allowing boats, roofs that are flat, farms, and other applications. It features stainless steel fasteners for speedy assembling and exact hole placement. Also constructed from rust-free alloy to withstand the environment, assuring longevity and dependability regardless of the environment.
