**Fibreform Con-Form Boards**

If you're looking for an alternative to timber formwork, FibreForm might be your answer. It's a fibreglass option that is designed to be strong, lightweight, and perfect for straight designs.

There is very little flexibility in FibreForm Boards which make it a perfect choice to use in long, straight run. It can also be used in conjunction with other Con-Form range using the same camlocks, pins, and joiners. It can also be used with timber and can be screwed into.
