# TRULY ERGONOMIC S-L TRACK

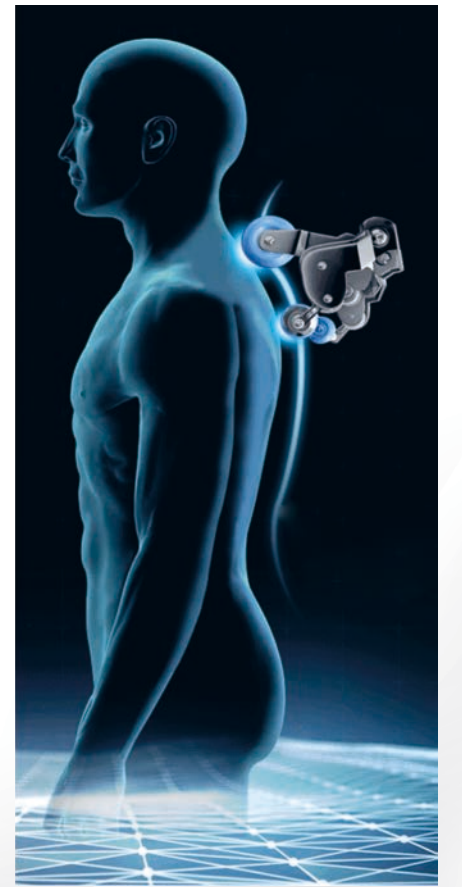

The FJ-8500 Massage Chair is ergonomically designed to follow the natural S-curve of the human spine. It provides support to both your neck and back, especially the lumbar area. This position increases the effects of massage as it enables each disc of our spine to individually separate and decompress, allowing nutrients to enter disc tissues. FJ-8500 TRACK seamlessly move from upright, to zero gravity, to lie-flat, and even inversion. While still allowing the seat, back, and legs to adjust independently. FJ-8500 massage chair can seamlessly execute massage in the zero gravity position and the lie-flat posture, and also offer exceptional range during back extension movements.

## BODY SCAN TECHNOLOGY

At the touch of a button the FJ-8500 will scan your body and not only automatically adjust the rollers for the perfect massage but also automatically adjust the height and width of the chair to fit your body. Coupled with the S-L Track Massage robot, the FJ-8500 capable of focusing on problem areas of the body like the neck, shoulder, and lumbar regions customizing and enhancing the massage experience.

Our highly advanced scan technology will detect every part of your body, and deliver a targeted, soothing massage. We designed this system with flexibility in mind since everyone likes different kinds of massages. If that is not enough, it can be adjusted manually as well. You can adjust the vertical position of the rollers from your neck all the way to your lower back.

Our massage chair is designed to fit people of all heights. Whether you are 4 feet or 6 feet 5 inches, we have engineered the chair to match your exact height. Our adjustable leg extensions make it easy to extend or shorten the legs to a position that makes you most comfortable.

## True 4D Deep Massage System

FJ-8500 give you a robust, full-body massage experience with greater adjustment controls and the ability to personalize your massage preferences. The device rollers move up-and-down, side-to-side and forward and backward. The fourth dimension of settings provided by 4D massage chairs is the speed at which the rollers move.

FJ-8500 allow you to adjust how slowly or quickly the massaging motions are delivered, giving you even more control over your massage experience. Allows you to adjust the rate of massage and select a cadence that's most soothing.

FJ-8500 Massage Chair simulates a human-touch massage with its 4D technology. You can control the massage speed from ultra-slow to rapid acceleration and select from a variety of movements and patterns to receive a relaxing and lifelike massage.

Our 4D technology will performs extreme deep tissue massages along your back, around your neck, and in the shape of your spine. The specially designed massage rollers protrude deep into your neck, back, and lower back to ensure that your whole body can enjoy the healing potential of a massage. Our 4D technology is so effective, you will feel like a brand new person after even the most stubborn stiffness is massaged away.

## Roller Heat

immerse yourself in the sensation of a “hot stone” massage with infrared heating located directly on the FJ-8500 massage rollers. This point-specific heat encourages blood circulation that helps loosen and soothe the paraspinal muscles.

## ZERO GRAVITY TECHNOLOGY

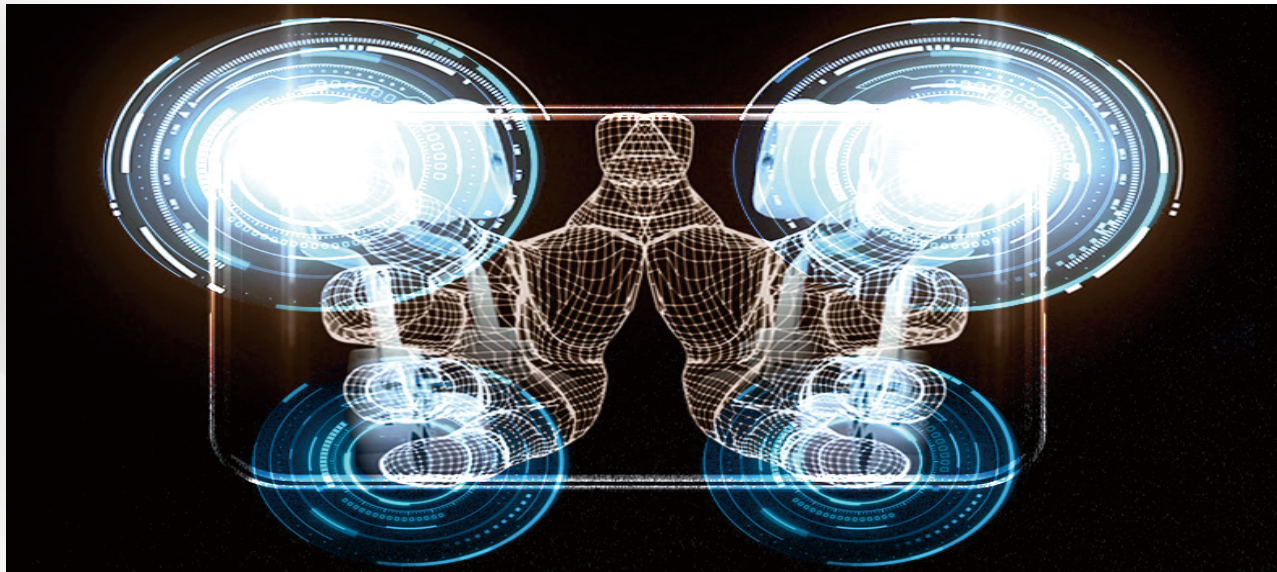

The zero gravity features on the FJ-8500 is notable because it is so effective and touts many benefits. Simply put the chair reclines and lifts your legs until you are in a position of complete weightlessness. As you can imagine, your body is completely relaxed and in this position you gain numerous health benefits such as pressure relief from the spine, relaxation of the neck and back, less pressure on the heart, increased circulation and blood oxygen levels and expanded lung capacity. Once you become positioned in zero-gravity by the inflatable air bags, the massage chair will assist you in finding the optimal position for your maximum comfort. Then, it performs a soothing, therapeutic massage to help you drift off to sleep. It's so relaxing it's been easier to fall asleep in a massage chair.

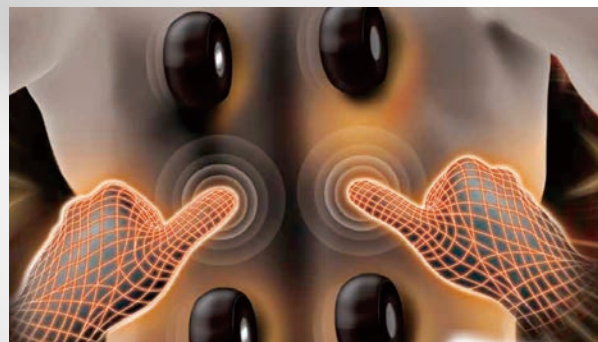

## QUAD STYLE ROLLER

FJ-8500 massage chair is equipped with extra soft quad style rollers to mimic the feel of the human thumb, thereby enhancing the massage experience. The width of the rollers can be adjusted to medium or narrow mode to suit individual needs for better penetrating effects. The rolling manipulation helps dredge the main meridians on the back, acanthus, forehead and the top of the head, along which the acupuncture points are distributed, to clear the collateral channels.

## AUTOMATIC PROGRAMS

There are **24** Auto modes with the FJ-8500 massage chair. The Automatic Programs are full body massage programs, suiting all sorts of different crowd, it have "FAVORITES" function, you can easily choose the program. And 6 localized programs only focus on certain regions, like Neck and Shoulder, Back and Lumbar and so on.

## MANUAL PROGRAMS

Manual Programs give you more flexibility to get the right massage to provide the relief you desire. Enjoy Tapping, Clapping, Rolling, and Kneading. You can also adjust the intensity and strength to get the right massage for you.

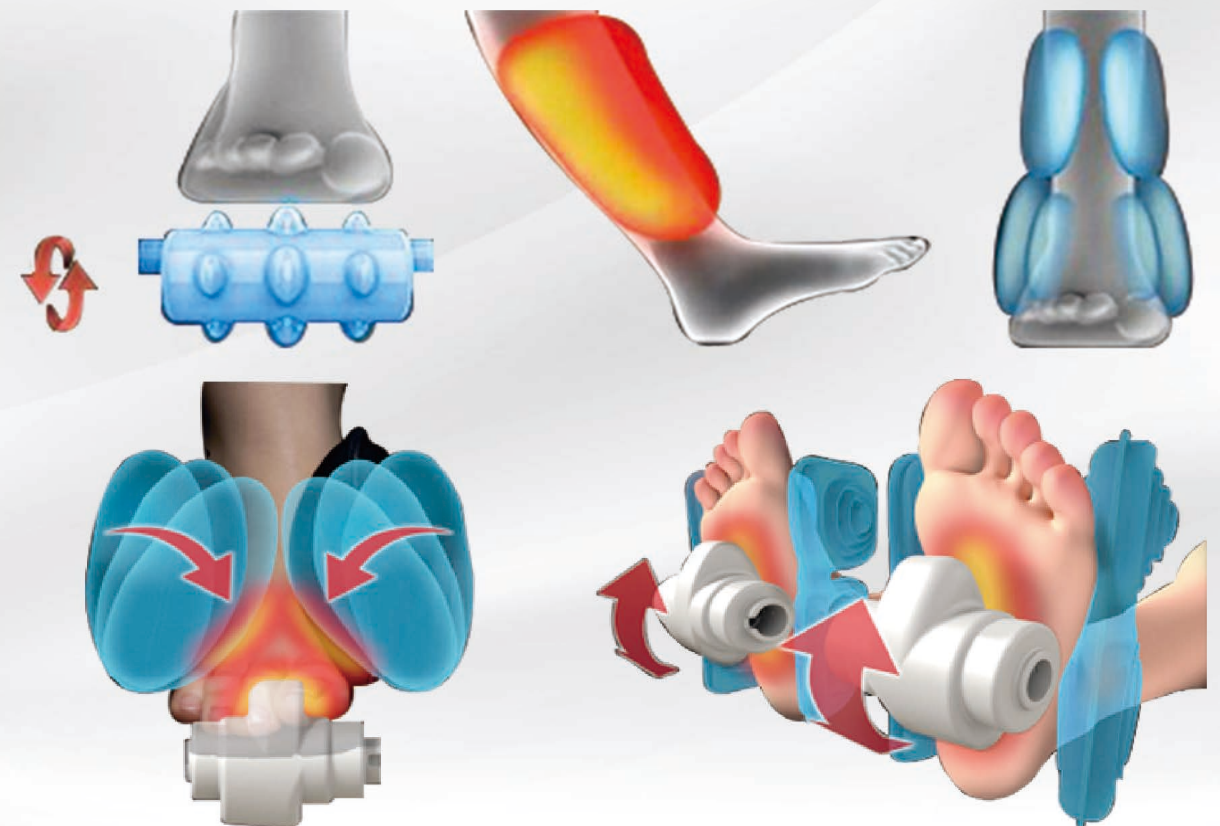

## NEW FOOT ROLLERS

FJ-8500 massage chair provides soothing reflexology massage to the soles of your feet, targeting the acupressure points to relieve tension throughout the body. Find sweet, soothing relief for tired feet. These carefully choreographed, two-way rollers gently work pressure points on the soles of your feet. The spinning rollers knead away foot pain and discomfort while the airbags increase circulation. This is a great feature for those that often have tired and sore feet and this is a great way to rejuvenate them.

## ELLIPTICAL CALF KNEADING

Let tension melt as complex movements mimic the hands of a shiatsu master, gently compressing and kneading your calves. This powerful and soothing capability enhances circulation, leaving your calves refreshed and renewed.

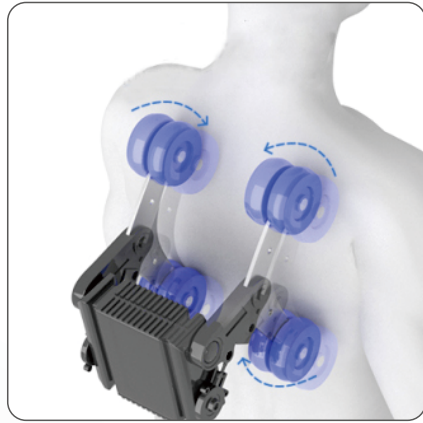

## Multiple massage function

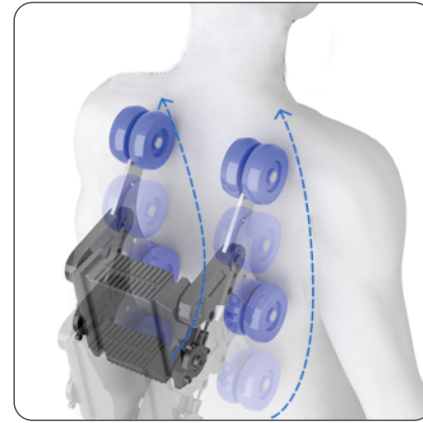

### Tapping:

rhythmical movements of gradually change speeds for an even more effective massage

### Kneading:

a slow deep knead, followed by a quick release. Actions re-enacting human hands

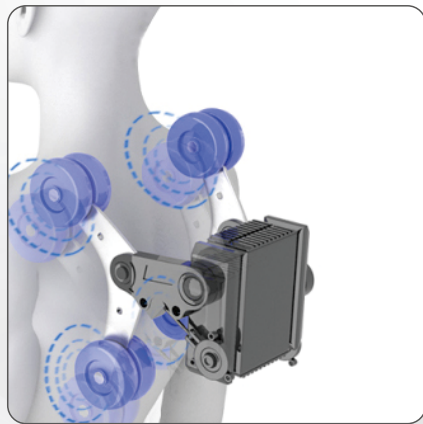

### Knead up/down:

basic kneading and tapping movements, with the addition of up/down movements. For a more fluid smooth massage

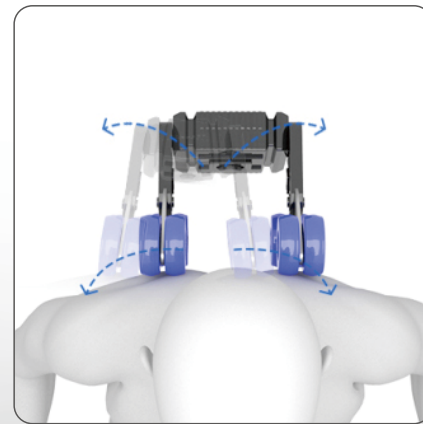

### Loop knead/tapping:

massaging across a wide range blending kneading and tapping techniques with up and down movements

### Acupressure:

effective in soothing strains. Neuralgia muscular discomfort in the back or buttock areas.

### Percussion:

deep stimulation of the upper shoulder from above to relieve tightness of the muscles

## Full Body Stretch

Stretching daily is an important part of optimum health. Daily stretching can improve energy and balance, relieve pain, and prevent future injury. Because of how beneficial it is for your body to stretch, we have built our Full Body Stretch function into every Medical Breakthrough massage chair. Our Full Body Stretch function holds your hips in place while your legs are pulled down and your back is stretched. Get amazing stretches every single day with our Full Body Stretch function and start reaping the health benefits now.

## Full-Body Air Massage

The FJ-8500 massage chair has 54 air cells with NEW air massage technology. Through innovative engineering, it has increased the volume and surface area of massage. Equipped with thoughtfully placed air cells throughout, the FJ-8500's air massage abilities grasp and hold for stretch movements while intensifying the effects of the mechanical massage features. Air massage elements stimulate circulation and release muscle tension in your feet, calves, hips, outer thighs, glutes, arms, hands, fingers, neck, and shoulders.

## ARM AIR MASSAGE

A new configuration to prevent the arms from sliding out during massages. The arms can be firmly massaged from both sides in a natural position. Along with mechanical advancement, the material has also made upgrades, such as the arm massaging area. Using a durable spandex to invigorate the senses as the four airbags compress the tops and bottom of the forearm and hands.

## SHOULDER, LUMBAR, AND HIP SQUEEZE

In the upper to mid portion of the chair, the 26 air bags are programmed to inflate at independent times, which causes the body to twist, creating an enjoyable deep stretch. Stretching is applied to the shoulders, lower back, hips, and thighs. The seat airbags work in concert to provide different twist combinations to relieve muscle tension around the waist area.

## CALF AND FOOT MASSAGE

There are 28 air bags along the sides and back of the legs and feet which inflate to apply a compression massage. Located along the bottom foot massager are spinning rollers that apply a concentrated pin-point kneading massage. The continued pressure and release from the airbags improves blood circulation from the calves to the feet soles, making foot massage more comfortable.

## LED Touch Remote Control

### “One Touch” control,fast operating

Smart control design enables you to start massage easily

### Intelligent LED Panel Control

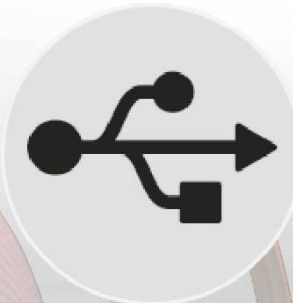

7-inch tablet control,with Fengyu operating system,easy tocontrol massage program.intelligence makes more enjoyable

adjust and monitor your massage with ease using the handheld remote. The intuitive, user-friendly interface makes setting up your session simple and can be selected in multiple languages.

## USB POWER PORTS WITH CELL PHONE SLOT

located at the front of each arm, the USB ports allow you to charge devices while you relax. Conveniently located slot allows a safe place for you to store your cell phone, TV remote, or other items that you don't want to wear or hold during your massage.

## Bluetooth Audio Immersion

heighten your experience by connecting your smart device to play relaxing sounds, music or your favorite guided meditation.

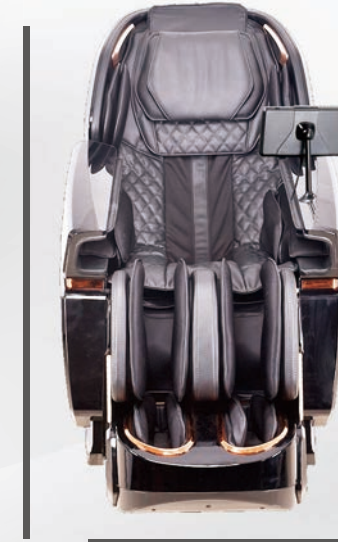

## SPACE SAVING

find the perfect location for your FJ-8500. With only a 5” (13cm) gap requirement between the upright backrest position and a wall, you can create a tranquil space just about anywhere within your office or home.
