INSPECTION PANEL ON METAL AND PLASTERBOARD

DESCRIPTION

Inspection Panel on metal and plasterboard with aluminium cover

Use: FOR INSPECTING WALLS AND CEILINGS ON PLASTERBOARD.

This inspection panel is on plasterboard, it has an aluminium cover and it is used for inspecting walls and ceilings on plasterboard.

The panel is a Water-Repellent Gypsum Plasterboard branded Knauf in accordance with standard GB/T 9775-1999.

USE

- The use and the mounting of the item, should be carried out by skilled personnel.
- This item must be used only once because its holding, term and stability features are guaranteed only for one application and not for other uses.

INSTRUCTIONS FOR USE AND INSTALLATION

- Trace and make a hole into the wall or ceiling, paying attention to the distances from the profiles of the frame.
- Separate the external cover and insert it in the hole and fix with drywall screws mm 3,5x25.
- At the end, put the protection caps on the screws.

WARNINGS

- The information concerning the features of the inspection panels to be used, can be read in the table "TECHNICAL INFORMATION".
- Risks due to a wrong mounting are quite relevant, in order to prevent them it should be paid attention to anchorage and to balance the structure. However, all the operations must be carried out by skilled personnel.
